SONO

better to the core

Introducing SONO, the German-made innovation in waterproof, dimensionally stable flooring. Featuring stunning HD direct-to-core digitally printed visuals and a ceramic composite core that's free of PVC, formaldehyde, phthalates and plasticizers.

Certified Safe

SONO contains no PVC, formaldehyde, phthalates or plasticizers. Its ceramic composite core is both GreenGuard Gold and Blue Angel certified.

Waterproof

SONO's unique composition is waterproof making it great for installations throughout your home, including kitchens, bathrooms or below grade.

Wear Rating

SONO products are rated at AC5 and are built to withstand the daily use of a busy household for years to come. Not only suitable for heavy residential spaces, SONO can also be used in light commercial applications.

Striking Visuals

Thanks to HD direct-to-core digitally printed visuals, SONO delivers ultra realistic wood and stone prints. Each SONO design covers 18 unique decor planks. The plank variability greatly reduces the repeat found in traditional laminate, WPC and LVT flooring.

Zero Waste

SONO is produced with careful use of resources. The residual waste from manufacturing is recycled back into the product.

Low Maintenance

SONO floors are easy to clean and do not require special or expensive cleaning agents. Just a quick sweep & damp mop are all that's needed to keep them looking their best.

Large Installations
100’ x 100’ room installations are possible with SONO due to its unique composition. Its density and stability combined with the Megaloc locking system allows for large installations without transitional moldings.

Dimensionally Stable
SONO’s ceramic composite core has virtually no expansion or contraction even in demanding conditions. This means it will not warp or gap when exposed to localized pockets of high heat.

Megaloc
Megaloc, a patented angle-drop installation system allows for faster installation. Simply lower planks and apply pressure at the short edge to lock it. Once installed, planks will stay firmly in place.

Dust Free Installation
SONO is a true score and snap product. No power tools are needed, only a utility knife to score planks.

Better Acoustics
SONO absorbs sound, giving it better acoustics and making it quieter under foot when compared to traditional wood or laminate flooring.

Fade and Stain Resistant
SONO’s surface is engineered not to fade or stain. SONO floors will look as good as new for years to come with high stain and fade resistance.

What makes SONO *better*?

Created by the Classen Group, a German-based pioneer and world leader in laminate flooring, SONO floors represent a true breakthrough in waterproof flooring. From superior stability and durability to stunning HD direct-to-core digital printing, SONO is a testament of German innovation, care and attention to detail.

Safe for your home and family

Nothing is more important than the health of your family; and the one place you should feel safest is at home. SONO floors are built on this belief. SONO's ceramic composite core contains no PVC, formaldehyde, phthalates or plasticizers and its patented production process uses heat instead of chemicals to form the core. SONO's GreenGuard Gold and Blue Angel certifications means it meets the highest industry standards for indoor air quality.

Composition

SEALTEC+ SURFACE
- 4 coats of UV-resistant lacquer

HD DIRECT-TO-CORE VISUAL
- Realistic, high definition dynamic print
- Unparalleled, highly detailed color range

ELECTRON-BONDED PRIMER
- Makes for a strong and consistent surface for the print and lacquer

MEGALOC JOINT
- Patented angle-drop locking system for quick installations
- Can cover rooms up to 100’ x 100’ without transitions.

CERAMIC COMPOSITE CORE
- Waterproof
- Dimensionally stable
- Contains no PVC, formaldehyde, phthalates or plasticizers
