CIH TREE TIMES

EDITION EIGHT NOVEMBER 2019

Upcoming Events

By Riley Sexson and Henry Houdek

There are many exciting events for the Children's House in the month of November.

Tuesday
November 5
Dragons Love Tacos
10;00 AM at Clowes
Preschool play

Friday
November 6
And So We Walked
10;00 AM at IRT
Science room

Sunday
November 10
Open House
1 - 3 PM

Tuesday
November 19
Aesop's Fables
10;00 AM at Clowes
Art Room

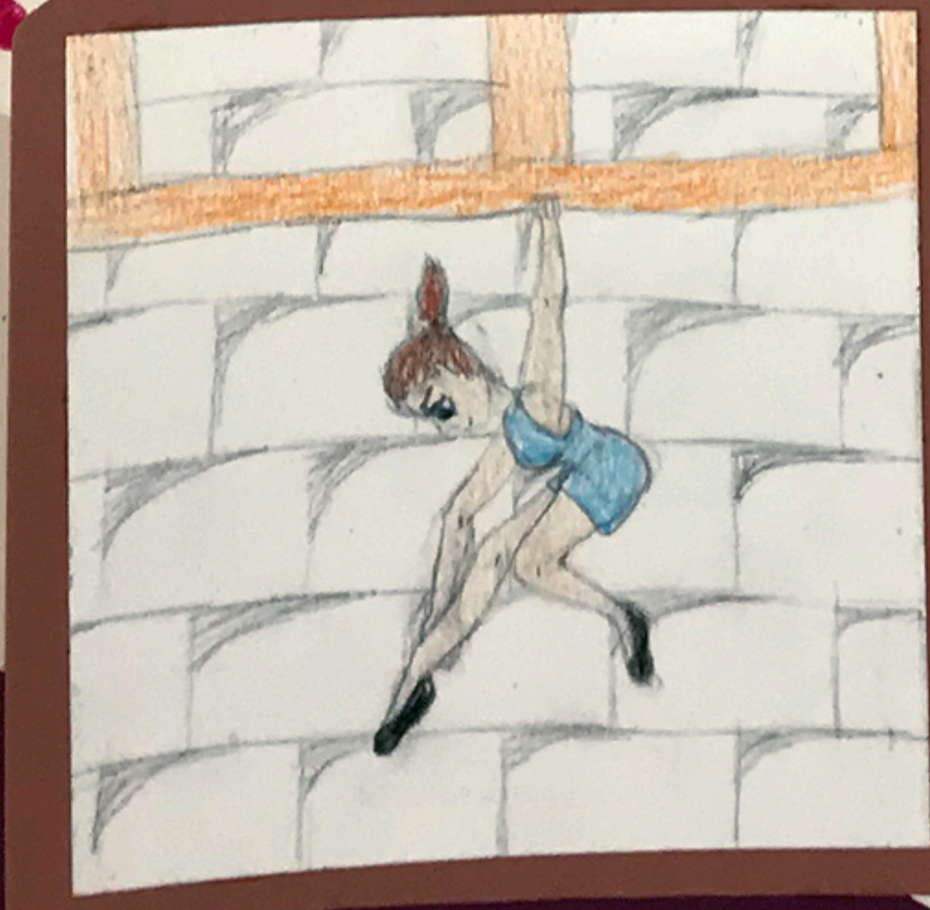
Tuesday
November 26
Annual Meeting
Talent Show
6 PM

Friday
November 15
Tumbling Begins
10 AM

Friday
November 22
Tumbling
10 AM

Thursday
November 28
Thanksgiving break begins

Monday
December 1
School resumes



Heifer

By Jameson Myles

Here at The Children's House every year, at Christmas, we raise funds for Heifer international. Heifer is an organization that helps poor villages or countries by giving them things that provide them with ongoing resources. Heifer gives things like a flock of chickens for laying eggs, or honey bees to make honey and for pollination, or a sheep for its wool.

One year we raised a lot of money. We raised about 320 dollars. We gave over four things. We gave a sheep, a goat, a flock of chickens, and a trio of rabbits. I think Heifer is a great way to show appreciation for what we have. And it is a great Christmas gift to people who need it. We are raising money for Heifer again this year.

A HAUNTED REVIEW

By Christian Tinsley

This article is a review of the haunted house event at The Children's House.

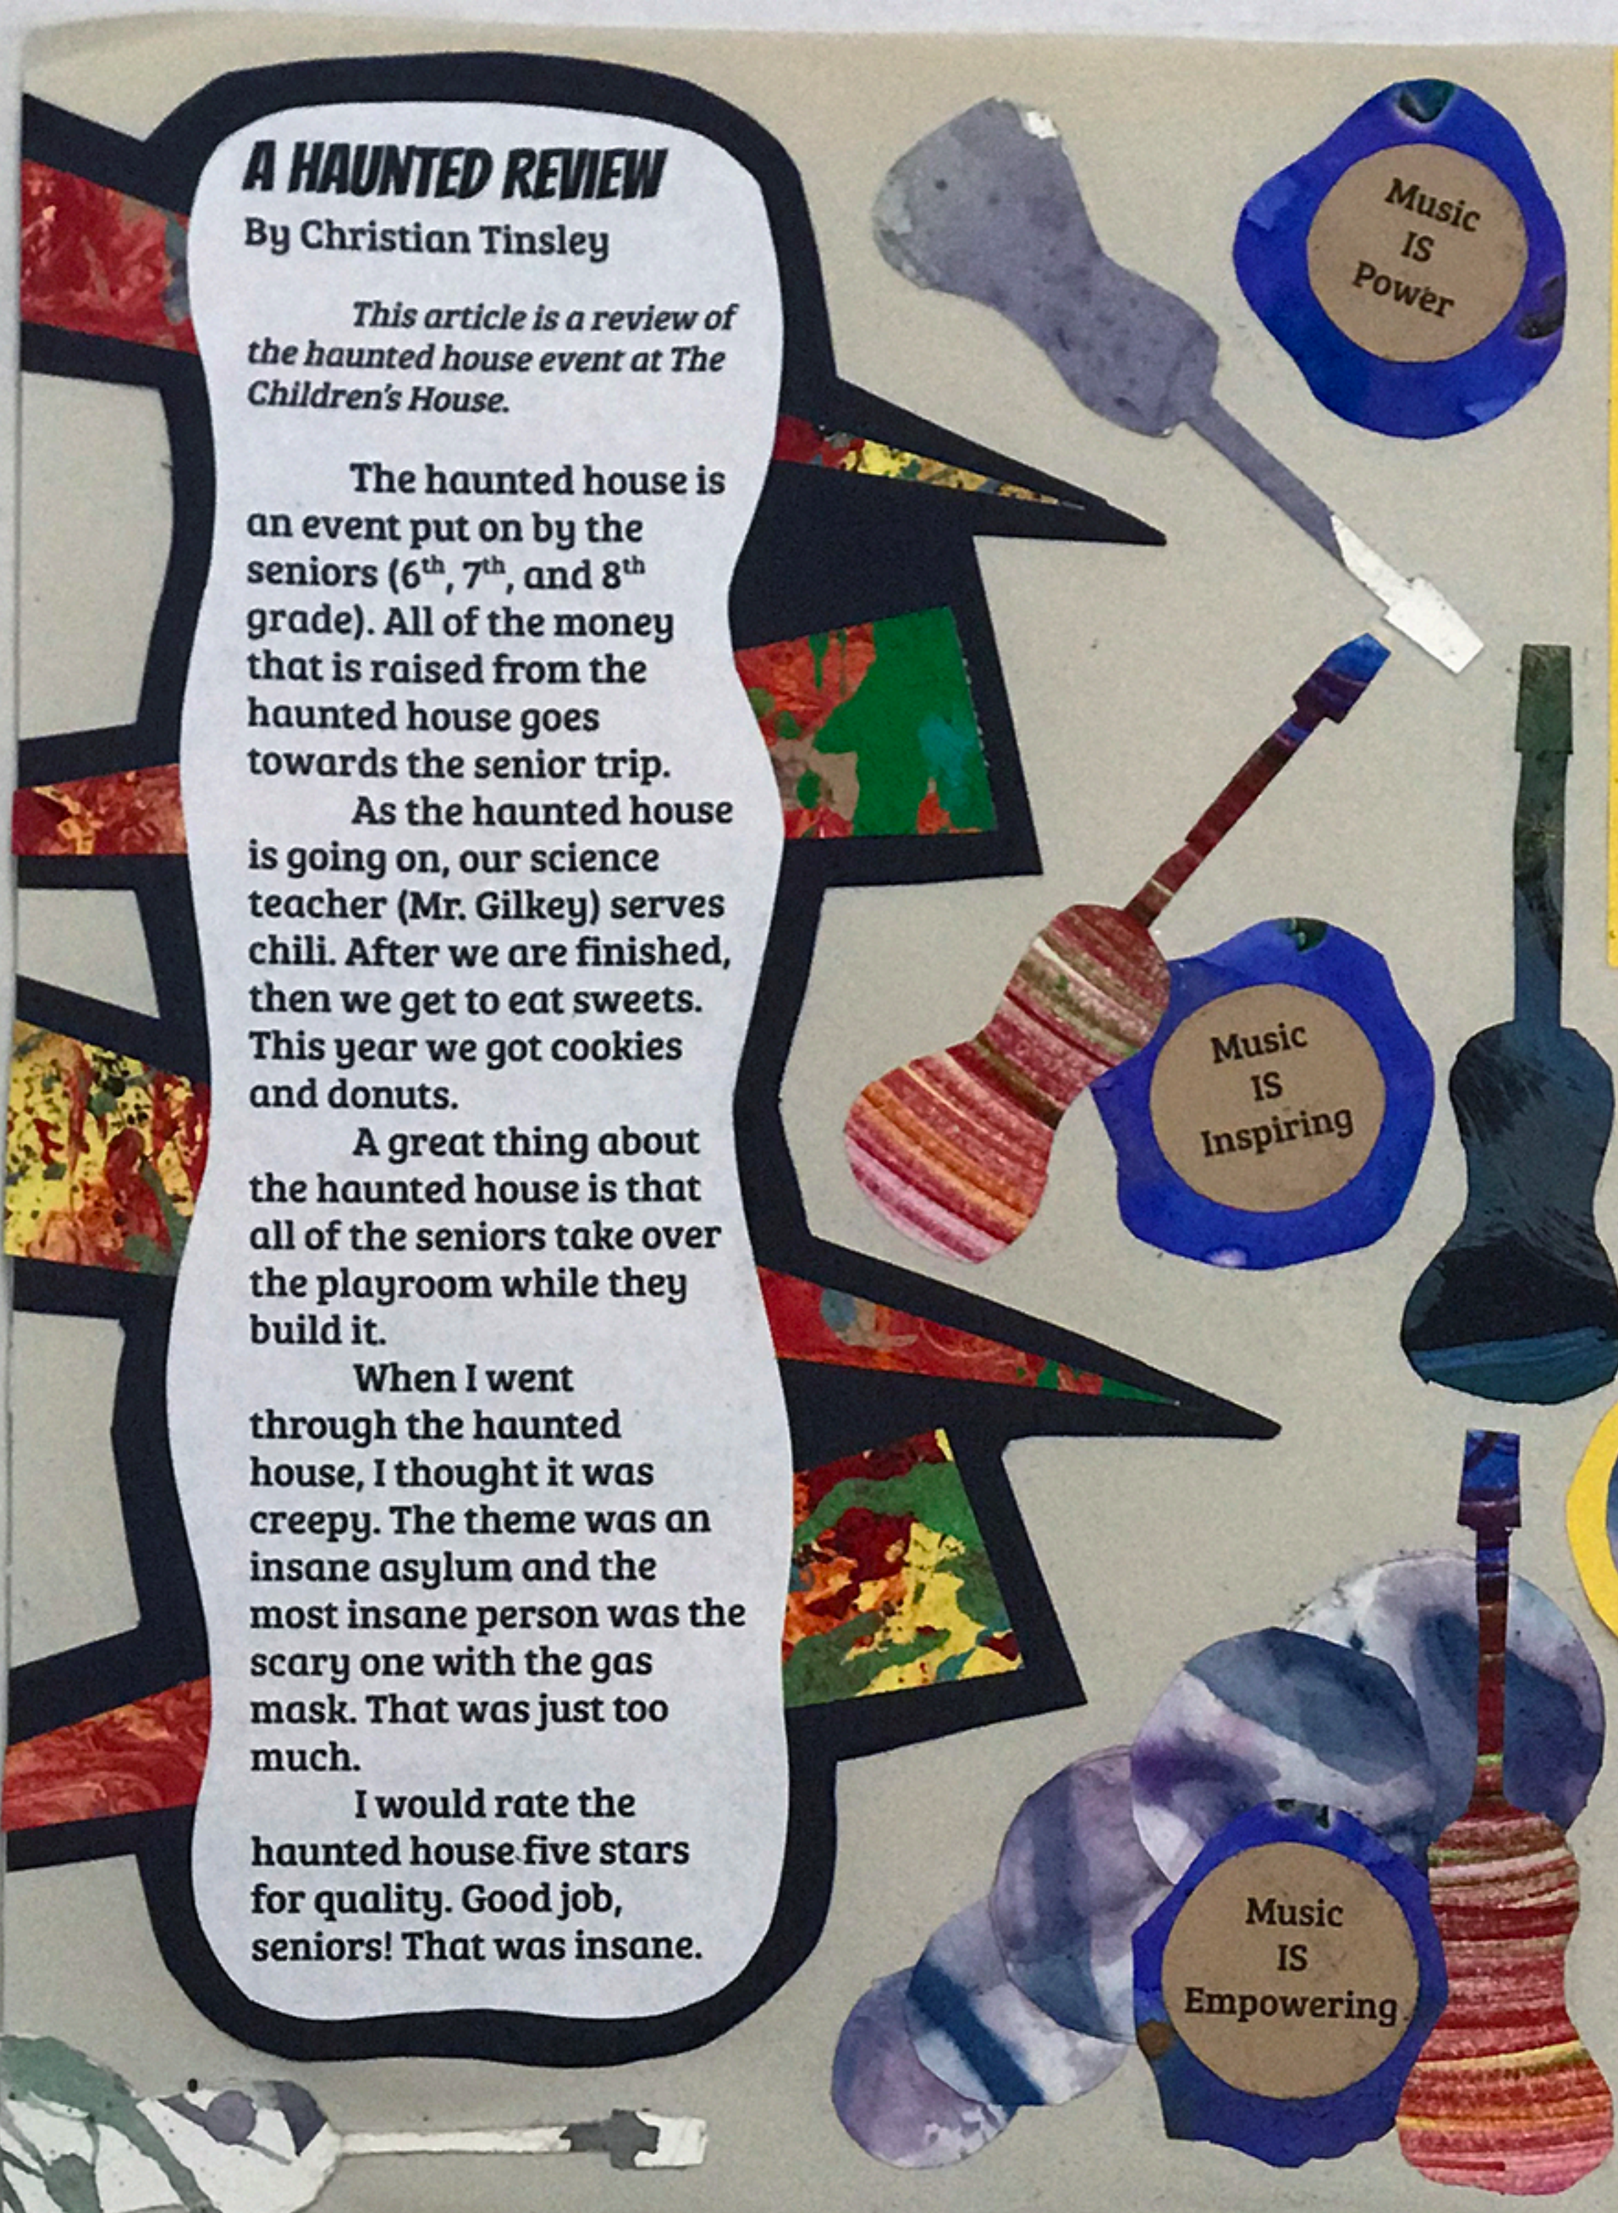
The haunted house is an event put on by the seniors (6th, 7th, and 8th grade). All of the money that is raised from the haunted house goes towards the senior trip.

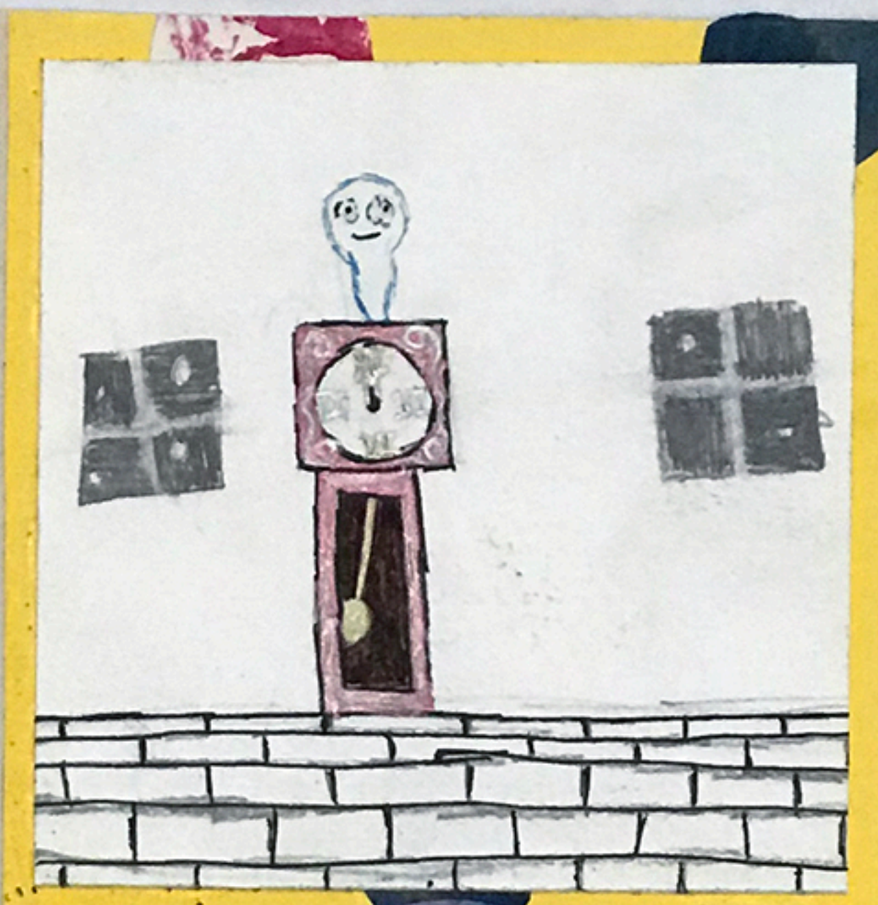
As the haunted house is going on, our science teacher (Mr. Gilkey) serves chili. After we are finished, then we get to eat sweets. This year we got cookies and donuts.

A great thing about the haunted house is that all of the seniors take over the playroom while they build it.

When I went through the haunted house, I thought it was creepy. The theme was an insane asylum and the most insane person was the scary one with the gas mask. That was just too much.

I would rate the haunted house five stars for quality. Good job, seniors! That was insane.





Science Lab

By Sasha Metzger
and Colin McHugh

In the science room, we do experiments such as the pendulum experiment. A pendulum is a swinging object that is connected to a given point. You can measure time and swings per minute. You can also learn about gravity and inertia. Here we hypothesized that the more weight you put on the string, the faster it goes, but this is not true. We still haven't tested major weights. The higher you put the pendulum (still the same given point) the more speed and inertia it has, but less swings per minute. You can make a pendulum at home. All you need is a string and a weight and a place to hang it. Try it!

Critics Rave About IRT's The Little Choo Choo

By the Math Roomers

From the critics...

"I liked the yellow train! Because he was big and strong and funny!"
- Aaliyah

"I think it is great for little kids."
- Abel

"I liked the Grandma train. She told the Little Choo Choo she could do it and she had polka dots!"
- AmaziYah

"I liked it when they fell down the big big hill."
- Izzy

"I liked holding the bird."
- Ellie

"I liked the red train because he was silly."
- Oliver

"I like that the yellow train had big muscles and was funny."
- Victoria

"It was funny."
- Rory
