SONY

DSC-H10/ B

Cyber-shot® Digital Still Camera

The Sony DSC-H10 features Face Detection technology to optimize focus, exposure and color for up to eight faces and optical image stabilization to prevent blur. Capture detailed images with 8.1 megapixel resolution, and get in close to the action with the 10x optical zoom lens, all in a compact body.

- 8.1 MP Super HAD™ CCD
  More megapixels give you more detail and definition when you make big prints or crop in tight on your subject. The advanced Sony® Super HAD™ (Hole Accumulated Diode) CCD design allows more light to pass to each pixel, increasing sensitivity and reducing noise.
- Carl Zeiss® 10X Optical Zoom Lens
  10X optical zoom provides a superb ability to bring long-distance subjects up close — a significant advantage for situations where you can't be near the action, such as sporting events or wildlife photography.
- 3.0"[1] Large Clear Photo LCD Plus™ Display
  The large, bright 3.0"[1] Clear Photo LCD Plus™ display, and an anti-reflective coating provides for excellent visibility to help you compose, view, and share photos with superb clarity and color reproduction, even in bright sunlight.
- Face Detection
  Face Detection technology automatically controls flash, focus, exposure, and white balance to help reveal faces in shadows, make skin tones look more natural, reduce red-eye, and eliminates harsh facial glare.
- Sony Double Anti-Blur Solution
  The combination of Super SteadyShot® optical image stabilization and high ISO sensitivity helps compensate for shaky hands, minimizes blur, and allow flash-free shooting to preserve the mood.
- Super SteadyShot® Optical Image Stabilization
  Super SteadyShot® Image Stabilization compensates for shaky hands and minimizes blur with a built-in gyro sensor that detects camera movement and sends correcting signals to a stabilization lens — so there's no need to crop in on your shot to reduce blur.
- High Sensitivity (ISO 3200) Mode
  With high sensitivity of ISO 3200, you can shoot effectively in low light without flash to preserve the mood, while the Sony Clear RAW™ Noise Reduction system helps suppress the color noise that can degrade low-light shots.
- Dynamic Range Optimization Standard
  Powered by the exclusive Sony Bionz® high-speed processing engine, Dynamic Range Optimization preserves image data in bright highlights and reveals more detail in shadows or backlit areas – for great results even in difficult lighting conditions.
- Advanced Sports Mode
  To capture fast-moving subjects in split-second detail, this innovative shooting mode combines high shutter speed (up to 1/4000 sec.) with Intelligent Continuous AF that responds more quickly to rapid motion – a great way to catch the perfect moment in sports, children's games, pet tricks and more.
- Convenient Photo Modes
  To adjust quickly for specific shooting situations, you can choose from several convenient photo modes, including Auto, Program Auto, and Scene Selections such as Twilight, Twilight Portrait, Landscape, Soft Snap, Snow, Advanced Sports Shooting, High Sensitivity, Fireworks, and Beach environments.
- MPEG Movie VX fine Mode
  Capture VGA (640 x 480) audio/video clips at a high frame rate (up to 30 frames per second[1]). The maximum length of time you can shoot continuously is about 10 minutes.

ADDITIONAL FEATURES

- Versatile Flash
- 9-Point Auto Focus
- Smart Zoom® Feature[1]
- Burst Mode
- Color Filter Kit
- Function Guide
- 31 MB[1] Internal Memory
- Memory Stick Duo™ Media Convenience
- Stamina® Battery Power
- HDTV Compatibility[2]
- "PhotoTV HD"[1]
- HD Slide Show with Music[1]
- In-Camera Retouching
- Picture Motion Browser Software
- BIONZ™
