6. Quality Policy Statement

Air Technology Ltd provides a range of expert skills and services designed to meet industry's ever-growing need to conserve energy and improve processes. Achieving this by identifying, proposing and where required implementing measures for improving operating efficiency and productivity, thereby saving money, reducing pollution and avoiding wastage.

We strive to provide a good, value for money service that meets the relevant and statutory requirements and endeavour to develop long-term working relationships with our customers.

The Directors and employees of the company value our customers and are dedicated to satisfying their needs.

We are committed to a strategy, which bases the development of the business on the pursuit of quality, customer satisfaction and continuous improvement. This is facilitated through the effective and consistent implementation of the company's operational management systems including the Health, Safety, and Environmental Management System, which reflects our customer and business requirements.

Our documented Quality Management System provides clear standards and guidelines, which are mandatory in all appropriate areas of the company's operation. It is the intent of the Company that the Quality Management System should satisfy, as a minimum, the requirements of BS EN ISO 9001.

The Company's goal is to achieve continuous customer satisfaction through the delivery of the customers' agreed requirements and the continual improvement of the company's operations.

This policy will be reviewed at least annually.

Signed: Dated: 28/05/2020

Eric Harding
Managing Director
