How people will access this site

People can access general game information, their badge dashboard (a display of how far they've progressed in each game) and a site share at any time on the site

People will play three games that test skills loosely related to 3 cyber careers. These 3 games will increase in difficulty over the course of 3 levels. People who complete all 3 levels of the game will receive a badge corresponding to that skill (i.e. the "Protector" badge). People can play any of these 3 games at any time (there is no logical order).

People who collect all three badges will unlock the Ultimate Challenge

There will be links to Today's Military Cyber Jobs page on the "Winning a Badge" pop-up (which will activate when a person completes a game) and on the general information page. People will be able to share the site or the badge they've won.
