Let the Summoning Begin...

Summoner's Circle is a six-piece theatrical metal band that blends elements of doom, death, black and progressive metal into what they refer to as simply Epic Metal.

For the band, every song is an incantation, every live performance is a Summoning, and everything they do is tied intrinsically to the mythology, or lore, they have created. The lore tells the story of the band's origins, battles of divine conquest and showcases their creativity and vision, which sets the stage for a very entertaining live performance where bigger is better, and Epic is always the standard.

The Summoners released their first EP, entitled *First Summoning*, in late 2015. This was followed in 2016 by the single, *Become None*, and its b-side, *Minotaur*, both of which will be included on the upcoming full-length release entitled *Tome*, which will be released later in 2017.

Summoner's Circle has shared the stage with:

Pentagram • Deicide • All Hell • Crowbar • Goatwhore • Place of Skulls • GWAR
