

Information, the way YOU want it.

Let us be your fly on the wall.

- In an OR setting know if your 'first case' times are starting on time.
- Monitor your waiting areas and be notified if patients are waiting longer than expected.
- Monitor capacity in certain areas to know ahead of time if crowding issues or delays are going to occur.
- Understand your patient cycle time in reporting.
- Understand where patients are spending their time and what interactions are occurring while in your facility, such as with caregivers.
- Know and understand room utilization rates while using the data to help Identify trends and bottlenecks.
- Ability to create sub tasks for phases of care to know when a patient is truly ready to be moved to the next phase of care.
- Unlimited number of workflows and phases of care.
