

Detox deliciously... **WITH SMOOTHIES!**

In a culture where obesity and disease are out of control yet we insist all our food should be "fast," isn't throwing a bunch of fresh veggies & superfoods in a blender the perfect solution?

Yet many people simply don't know where to start...join one of the region's top educators for this unique and TASTY workshop and learn how just a few minutes a day can add years to your life!

Smoothies are a major component of any whole-food diet and offer a myriad of health benefits including:

- Easy detox & natural weightloss
- Reduction of all disease risk & symptoms
- Balanced blood sugar & improved craving control
- Improved mood, sleep, energy & focus
- Strengthened immune system & stronger bones
- Age-defying skin, hair & nails

Participants can expect to walk away knowing how smoothies make "crowding out" poor food choices a piece of cake, the value of blending versus juicing, what to add and why you should add it, which blenders are best, great recipe suggestions, plus a whole lot more!

AS SEEN IN MAY 12, 2015 DELAWARE NEWS JOURNAL.
