Customer Stories

FHIR backend /

Narus Health, a Lucent Health company, has developed an integrated care management platform on top of the Aidbox FHIR backend, supporting patient care while enhancing outcomes and the recovery process

FHIR backend /

BodyLogicMD has built a full-blown EHR system on top of the Aidbox backend in just 2 years, supporting hundreds of practitioners and thousands of patients in the field of hormone replacement therapy

RONIN

CDR /

Project **Ronin** hires Aidbox as a FHIR data platform for its cutting-edge cancer intelligence software, providing clinicians with real-time data to identify the best treatment plan and improve quality of life for patients

FHIR backend /

Heal selects the Aidbox FHIR backend as the best match to develop an advanced medical care EHR system for in-home primary care to support the health and well-being of the senior population

FHIR backend /

Patients Know Best leverages Multibox as a FHIR backend to reinvent the world's first medical patient-controlled records system, which is designed to improve the patient experience and access to NHS services

FHIR backend /

BestNotes uses the Aidbox FHIR backend to build a FHIR-first version of a HIPAA compliant EHR/EMR system designed specifically for addiction treatment and behavioral health industries

CODA-19

The multiple features of Aidbox in terms of security and access control, its unique APIs and ease of implementation are major assets in the development of our solution

We have decided to use Aidbox due to its scalability, reliability, and ease of use. We appreciate the prompt, top-notch support Health Samurai continues to provide to our team

We were one of 10 organizations out of 350 that were able to hit the Interoperability deadline, and honestly, it was 100% as a result of working with Health Samurai
