

OIL AND GAS, MINING, POWER GENERATION, SKI LIFTS, ZIP LINES

Our inspectors have more than 40 years of experience providing services that include:

- Turnarounds
- General mechanical integrity
- Tank inspections using all required equipment, including MFL tank floor scanners and X1 tank thickness crawlers
- NDE services: MT, PT, UT (thickness and shear wave), and VT
- API 510/570/653
- Establishing and maintaining plant mechanical integrity programs
- Zip Line trolley inspections including Ziptour, Zip Rescue, and Double Trolleys

SKI LIFT INSPECTION

We provide inspections on practically everything to help get skiers and riders up the hill, except the cabling.

- Towers
- Bullwheels
- Chairs/Carriers
- Cable Grips
- Gear Boxes

We currently *do not* provide cable inspection services.

Inspection processes include:

- UT Shear Wave
- UT Thickness
- Magnetic Particle
- Penetrant Testing
- Visual Testing

ALLIANCE WITH VIR INSPECTION LLC

Through our alliance with VIR Inspection, we are able to expand our NDE services to include:

- Boiler and Heat Exchanger Tubes
- Eddy Current
- IRIS Testing
