

## EXERGEN GLOBAL FORMS PARTNERSHIPS IN SOUTH KOREA, CHINA AND TAIWAN STRENGTHENS ITS BRAND AND LOCAL PRESENCE IN ASIA

### Moves Will Expand Reach and Drive Growth

**WATERTOWN, Mass. and ZIJTAART, the Netherlands, August 20, 2018** - Exergen Global, an award-winning thermal solutions provider, announced today that as part of its ongoing expansion in Asia it has entered into partnerships with businesses in China, South Korea and Taiwan. The company currently has agreements with many distributors in Asia and said that the partnerships will help expand its presence and bring its products and services directly to customers in the region.

“Exergen Global has well-established, very successful operations in the Europe and the United States – both areas where we continue to grow,” said Bart van Liempd, CEO, Exergen Global. “We’re establishing partnerships in Asia because we see tremendous opportunities to provide thermal management solutions to OEMs there, particularly in many of the markets where we excel, such as medical, aesthetic, graphics, textile and others. By forming partnerships, we can work directly with customers to provide the R&D, custom solutions and services Exergen Global is known for.”

#### Exergen’s IRt/c product line includes:

- **Pre-calibrated IRt/cs:** The world’s only self-powered infrared thermocouple. Best for low temperatures (< 500 °F) and non-metal or coated metal surfaces.
- **Microscanners:** A NIST traceable IR thermometer. Measures non-contact or contact to achieve true accuracy on non-metal or coated metal surfaces from temperature ranges of –50 to 1600 °F. Remote sensor versions are also available.
- **Adjustable IRt/cs:** A self-powered, infrared thermocouple that is field calibrated. High temperatures (up to 5000 °F) and metal surfaces can be measured. Special optics available for small spots and far distances (up to 100:1).
- **Thermal Switches:** The SnakeEye thermal switch can detect presence of hot objects (such as hot melt adhesive, labels, laser engravings, seals, and pressed fit parts) with its photo-cell-like, thermally sensitive, fast switch.

Exergen holds more than 75 patents in the field of non-contact IR temperature sensors, and offers the industry’s only self-powered IRt/cs. Its sensors have mean-time-between-failure (MTBF) rates of a thousand years, deliver accuracy of within 0.01C., and have high repeatability, 0.0001°C resolution, and response times between 50 and 150 milliseconds.

#### **About Exergen Corporation and Exergen Global**

Exergen Corporation, the global leader in industrial and medical non-invasive temperature technology, provides non-invasive temperature measurement devices providing lower cost, higher accuracy, less invasiveness, and greater reliability than ever previously possible. Exergen is well-known for its award-winning temporal artery thermometer in the healthcare and consumer market. The company was founded by Harvard Research scientist Dr. Francesco Pompei who holds over 75 patents. Exergen Corporation is based in Watertown, Massachusetts, U.S. Exergen Global, an HP Strategic Partner for 2017, is the

worldwide solutions provider of Exergen Corporation's industrial non-contact infrared temperature sensor solutions and the recipient of the 2015 Global Frost & Sullivan Entrepreneurial Company of the Year Award (<http://bit.ly/2pYfsy4>).
