Hi there, I hope you're doing great!

I'm Maximo Gomez, I'm a Digital Product Designer with 10+ years of experience working with entrepreneurs, startups and companies to define, design and prototype stunning user-centered mobile and web applications for Health-Tech, Fin-Tech, Share Economy, Social Networking and more.

I'm a Well-rounded Designer with real work experience in many fields, I started as a Graphic Designer and immediately I turned my career into the digital world as a Web Designer and Frontend Developer, then I worked a lot as a UI/UX Designer for web and mobile to finally in the latest 6 years, I been focused on Product Discovery phases and techniques.

Normally I involve the whole team and stakeholders as an essential part of my design process, beginning every new project understanding the problem and identifying the users and competitors, then propose user's journeys and lo-fi screens as the possible solutions, after choose and validate the solution; I recommend to quickly define the overall style using a mood-board to finally focus on craft a hi-fi interactive prototype ready to test. All in a rapid iterative process to ensure the best possible deliverables.

I'm from Montevideo Uruguay, and currently, I'm actively looking for a great team or company from the US, Canada or Europe to relocate me and my family there and continue growing while working with inspiring people, I'm also open to joining remotely.

If you want to know more about me please visit my online portfolio website: <http://maximo.design> and take a look at my resume: <https://goo.gl/1eN3XN>

Usually, I'm available to talk, and you can reach me out anytime at:
