

Provided Program and Construction Management Services to Assist in the Development and Construction of the National Museum of African American History and Culture

McKissack & McKissack represents a part of the rich history embodied in the Museum. The company originates from the oldest minority-owned architecture and engineering firm in the nation. Its roots began before the Civil War when Moses McKissack—a slave in Tennessee— became a master builder, earned his freedom, and started a legacy that began with designing and building the 99th Pursuit Squadron Airbase in Tuskegee, Alabama—home of the famed Tuskegee Airmen.

McKissack & McKissack is a national architectural, engineering, program and construction management firm with 27 years of experience working with clients to envision and deliver building and infrastructure projects that enrich people's lives and empower communities to flourish nationwide.

EXPERTISE

Architecture

The McKissack & McKissack (McKissack) philosophy of architecture and design is to focus on exceeding the expectations of our clients. We never attempt to impose a specific aesthetic on a client or project, but rather we work with clients to match their goals with an appropriate design solution. This ensures that we can create a design that will fit into the community while being a welcomed addition as a distinct structure.

Program & Construction Management Services

McKissack provides single-source capabilities for managing programs and projects from initial planning through occupancy. We have a proven history of successfully executing on projects in both public and private sectors. We categorize our services within six fundamental phases of a project lifecycle: program development, design, procurement, construction management, closeout and relocation.

Infrastructure

McKissack's highly experienced staff of engineers and specialists have successfully managed and implemented infrastructure project solutions for a wide range of clients. Our experience covers a broad spectrum—from managing road improvements to water treatment and distribution, storm and wastewater collection and treatment to implementing green infrastructure designs. The firm's diversity of services allows us to successfully manage clients' projects from conception through completion, whether the project is new construction, renovation, or environmental issues.

McKissack & McKissack has offices in Washington, DC, Baltimore, Miami, Chicago, Detroit, Los Angeles, and Dallas.
