

1.3.1 S-sarjan seinäläpivientien (K70/K100) mittatiedot ja kuvaukset

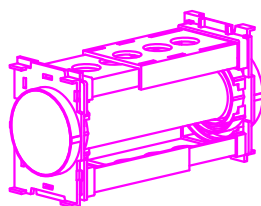

K70(100)

K100(70)

<- Sama tuote ->

- Läpivientimoduuli K70(100) voidaan asentaa kummin päin tahansa, mikä mahdollistaa läpivientisarjassa putkille keskeltä keskelle -mitaksi joko 70 mm tai 100 mm
- Maksimiputkikoko on \varnothing 43 mm, mutta tällöin ei juurikaan jää tilaa raudotteille läpivientimoduulien väleissä tai putkien eristämiseen läpiviennin ulkopuolella
