

CONTRACTOR'S TRIPLE

TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

Contractor's Triple is a rich, dark, coarse textured blend of mineral soil, composted bark and leaf and yard compost. It is designed to be used as a complete planting mix for a wide assortment of plant types and applications. Due to the addition of compost, Contractor's Triple provides more organic matter but less mineral component compared to Gro-Bark's LA Planting Soil.

Contractor's Triple has been engineered to function as an ecologically-friendly alternative to peat heavy soils.

TYPICAL ANALYSIS

pH*:	6.5 – 8.5
EC*:	< 2.5 mS·cm ⁻¹
Organic Matter Content:	15 – 20 % by weight (dry)
Sand Content:	40 – 50% by weight

APPLICATIONS

Contractor's Triple has been designed for a wide variety of plant material including a combination of trees, shrubs, perennials and bedding plants. It is ideal for commercial applications but can also be used for general purpose plantings.
