

LIVEMULCH® TERROIR BLEND

TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

LiveMulch® Terroir Blend is a blend of high quality compost products used to build soil life in vegetable gardens. It has a rich dark brown colour and an earthy smell, indicative of its high organic matter content. When added to soil, the organic matter contained in LiveMulch® Terroir Blend helps to foster the growth of beneficial soil microbes, build soil structure and promote the development of a healthy soil ecosystem.

LiveMulch® Terroir Blend has been approved for use in organic agriculture by Ecocert Canada.

TYPICAL ANALYSIS

pH*:	7.0 – 8.0
EC*:	< 3.5 mS·cm ⁻¹
Organic Matter Content:	≈ 60% by weight (dry)
Minimum Size Gradation:	95% < 5/8"
Moisture Content:	45 – 65 %

APPLICATIONS

LiveMulch® Terroir Blend was developed to amend existing soil in vegetable gardens or raised beds. It provides a boost of organic matter which rejuvenates the microflora and promotes the development of a healthy soil. This product can be used on an annual basis to ensure vegetable gardens or raised beds do not become depleted of nutrients or devoid of life.

LiveMulch® Terroir Blend can also be used as a top dress in flower or vegetable gardens to supply nutrients to the plants while suppressing weed growth.
