

MazeMap – The IoT Map Platform

MazeMap enhances your IoT products by offering an intuitive, cost-effective and flexible platform to illustrate where everything is located.

Visualize the location of everything

- High-quality interactive indoor maps on a web-based platform.
- Illustrate anything with an (x,y,z) coordinate using our APIs.
(www.mazemap.com/docs for documentation)
- You can even illustrate in real time moving objects like machinery or people.

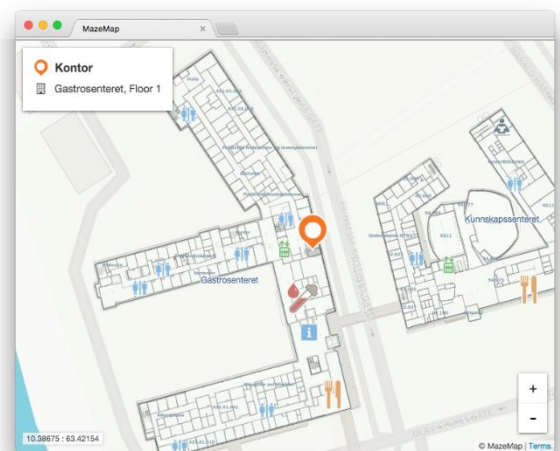

Scalable and easy to manage

- Using artificial intelligence and machine learning, we generate indoor maps more cost-efficiently than anyone else.
- Customize map appearance and behaviour using our map editor and APIs.

Endless further possibilities

- Leverage indoor maps for other purposes, like:
 - Wayfinding
 - Map links with directions in meeting invitations in Outlook
 - Alarm systems
 - Enhance all kinds of apps and web services!
