

VOTE FOR SCIENCE

SCIENCE IS NOT A CONSPIRACY

There are certain scientific consensus - reached by rigorous research - which are not contradicted by opinion. Policy must be informed by constituent needs and evidenced-based fact. Government that ignores science endangers the world.

CLIMATE CHANGE IS REAL

Humans are playing an increasingly important role in preserving the lush diversity of the Earth. A better understanding of and increased investment in - sustainability measures benefits public and environmental health.

**FACTS
ARE NOT
POLITICAL -
IDEOLOGICAL
REJECTION
OF THEM IS**

Guest Speakers

Guest speakers from academia and industry will discuss how science plays a vital role in our everyday lives and environment. Topics from environmental protection, sustainability, renewable energy, public health, STEM education and legislation.
