# How a Grid-Tied Solar Electricity System Works

## IS SOLAR ELECTRICITY RIGHT FOR YOU?

Solar Electricity Systems are particularly beneficial to residential homes running items such as electric hot water cylinders, deep freezers, air conditioning units, underfloor heating, swimming pools or spa pools. All of these can be set to operate during the daytime when your solar system will be producing electricity.

## Solar Electricity Division

Guild & Spence Solar is a division of Guild & Spence Electrical Ltd, specialising in residential and small commercial solar electricity installations across the Bay of Plenty and Waikato with a specific focus on the residential new house build industry.

We provide bespoke systems designed to align with household consumption patterns. With consistently increasing power prices and solar costs having reduced significantly, now is the time to install a solar electricity system and start saving on power bills. For anything solar, we're here to assist!

### 1 THE SUNS ENERGY CAPTURED BY SOLAR PANELS.

Our systems are built to withstand cyclone force winds. Our solar panels come with long term manufactures warranties and performance guarantee.

### 2 CONVERTED TO ELECTRICITY FOR USE IN YOUR HOME.

Your inverter controls the flow of electricity between your solar panels and your home, allowing you to monitor and manage your power consumption.

### 3 DISTRIBUTED TO YOUR HOME OR THE GRID.

The main switchboard takes electricity from the solar inverter and sends this electricity to power your home.

If excess solar electricity is produced this is exported to the national grid and most electricity retailers will credit you for this. If not enough solar electricity is being produced, then it will be imported from the grid, like at night.

## THE GUILD & SPENCE ADVANTAGE

### FREE QUOTE

For a free site visit and obligation free quote call **07 575 5328** or email [solar@guildspence.co.nz](mailto:solar@guildspence.co.nz)

### NO PAPERWORK

Nobody likes filling in forms. That's why we take care of all consents and paperwork required to get your system up and running.

### NO HIDDEN COSTS

We offer complete turnkey solutions, with one fixed price including layouts, site visits and system installation.

### ADDED VALUE

Not only will you save on power bills, a solar system will add capital value to your property.

## WE PROVIDE SOLAR ELECTRICITY TO POWER YOUR HOME.

**SOLAR ELECTRICITY**

- Produces electricity for the whole house (including hot water).
- Excess electricity can earn you credit on your power bill.

**SOLAR HOT WATER**

- Heats water only and does not reduce any other electricity costs.
- Excess hot water goes unused.
