

Be WITH US.
Inspire intervention.
Prevent campus tragedies.

College campuses nationwide continue to grapple with curbing incidents of alcohol-related deaths, hazing, sexual assault, hate and bias, and other acts of violence. Conversations with families of victims and prevention leaders made clear that we must do more to help and hold one another accountable.

WITH US empowers the bold choice to help.

Led by experienced researchers and student affairs leaders in higher education, *WITH US* brings together a network of industry-leading organizations and advocates in prevention to develop and share effective bystander intervention strategies to create safer campus communities.

Our Commitment

Join our growing network of care.

Outreach: To build and maintain partnerships with students, families, educators, and student-supporting organizations to confront barriers to student health, safety, and success.

Research: To lead and share innovative research and program evaluation data to build prevention evidence base and improve effectiveness.

Resources: To develop and share evidence-based bystander intervention strategies, tools, and resources to support campus communities in their prevention efforts.

Education: To provide training and education solutions for students and educators designed to shift attitudes, develop skills, and improve bystander behaviors.

Partnership Opportunities

Join the network at WITHUS.org. Let's work together to create safer campus communities!

- WITH US Education Partners**
 Students, parents, educators, practitioners, universities, fraternities and sororities, and other student supporting organizations that are WITH US in our mission to promote positive bystander behaviors.
- WITH US Prevention Partners**
 Leaders in public health, violence and substance misuse, bystander intervention, and community activism that collaborate alongside WITH US to develop and share research, resources, and education.
