

MOBIDI

Smartest Way For
Field Data Capture

MOBIDI

MOBIDI can work offline or online for field-working teams
Mobile Data Collection and Team Management application.

It provides data to be recorded and shared in the fastest way,
such as audio, photos, videos and notes.

The data automatically merges into the office.

It becomes ready for query, report, sharing and integration.

Areas of Usage

MOBIDI offers appropriate solutions to the various needs of different sectors.

Security

Whether it's a site, a factory, or a university, the need for security is always the same. Patrolling teams must go and check at certain points at certain times. With MOBIDI you can create as many control points as you want without the need for an additional device. You can easily report which point you went to (where you left off). Your security team can take a picture of a broken lock or broken glass beyond a simple "I have been there". You can request documentation at any point you wish.

Documentation

TEPESERVIS documents cleanliness of ATMs with MOBIDI. The banks are ensured of the quality of work done on ATMs with the reports sent through MOBIDI. Documentation can be done and controlled from offices by ensuring that sub-contractors use MOBIDI. With this method, which will provide speed and practicality, you will only go to the site for final control.

Service

The fridge breaks down, the boiler breaks down, the service comes on. A base station is failing, the repair crew is on the way. In all these cases, all the needs such as documenting the fault, writing the work done, recording the serial numbers of the changing parts can be met with MOBIDI. You can easily prepare several reports and analyzes such as the number of services you gave last month, regional analysis, distribution of service products and so on.

Delivery

Was the material delivered on time? Was there crushing or breakage during delivery? Was the delivery document received? MOBIDI is the answer to many questions such as. Take your reports, have your delivery documents entries in the system and enjoy the process.

Audit

Audit requirements can be very different for each institution. You may be inspecting the neighborhood market or checking the appropriateness of a construction permit or checking the daily production on site. In an energy company, for instance, you might be looking at whether the masts are made according to the specifications.

Explore

Opening a branch or building a bridge? Perhaps, getting photos from the field for a project. Documenting the apple trees or the well in the garden for expropriation? MOBIDI can provide with all types of records on the data information that needs to be kept on the map.

Survey

Aksaray Municipality is conducting a survey project called "Municipality at Home". The field surveyors are using MOBIDI. There's a lot of information from the collected data. With MOBIDI you can prepare a questionnaire within minutes and distribute it to the teams.

Follow-up of Requests and Complaints

It can be enabled that a limited number of users or citizens could deliver their wishes and complaints with MOBIDI. Records of complaints with their time + location data, the action that will take and documentation of all the reports can be done easily.

Project Monitoring

You can monitor your construction sites, fairgrounds being setup or the billboards being changed by teams. Control of work done, proof the job is done to the owner and various reports can be easily obtained.

Application Specifications

You can evaluate the basic properties of MOBIDI in many areas.

Work Offline

You can use MOBIDI with or without network access (internet). If the site does not have a network or is very restricted, the information you collect is stored on the device. When Wi-Fi or 3G access is detected, it is automatically sent to the office.

Data Capture with Photo, Video

When collecting data, it should not be absolutely understood as writing or entering numbers. For MOBIDI, photos, audio or video are also available. You can draw attention to any point by adding notes or drawing on the photo.

Voice Recording

One of the easiest and most effective ways of collecting data while walking is voice recording. You can click and listen to the voices recorded during a review or discovery at a site or an accident site on the map.

Is the work really done?

Unfortunately, some of the things that are thought to have been done are actually have not been done yet. With MOBIDI you can completely erroneously misrepresent your statements. The location and time of the collected data is reliable with MOBIDI.

Read Barcode, QR Code

You may need to document, exchange, inventory or read Barcode or QR code for different purposes in field activities. With MOBIDI you can do these without any additional software or hardware.

Field to Archive

Contracts that field employees photograph, delivery minutes or any other documents are automatically made OCR and they are ready for search. MOBIDI and GEODI work together to do many different things.

Online Reports

MOBIDI's high level reporting and analysis capabilities can be used in a wide range of applications, from simple lists to complex pivot analyzes or graphs.

MOBIDI reduces the time spent on the field for audit or certification.

You will get accurate information from the field,
prevent the confusion created by methods such as WhatsApp and e-mail.

With the right position and time information, you avoid potential problems.

You will get daily and accurate reports.
