

# Introducing Communicate™ Mobile

Helping organizations *simplify complex scheduling processes* through our mobile app to *boost employee engagement*.

## Overview

Vocantas' NEW mobile app, Communicate™ Mobile, is an interactive communications solution used for two-way automated, mass communications with employees. Organizations with complex scheduling environments and processes can improve employee shift fill results with mobile outreach and engagement while reducing operating costs with this innovative app! Communicate Mobile is compatible with android and iOS systems and can be conveniently downloaded from the iOS App Store and Google Play Store, making it easily accessible.

**Get our mobile app today!**

## Functionality

Communicate Mobile with **Automated Shift Fill (ASF)** leverages your scheduling solution to provide your scheduling office with the automated communication tools needed to efficiently and effectively fill open shifts. Ensuring the right team member is in the right place at the right time is made easy using ASF mobil

## Benefits:

- Reduced SMS costs with push notifications.
- Employees are notified of open shifts and can bid on shifts through our mobile app and/or by SMS, phone, email, or the online Employee Portal.
- Shifts can be partially or fully bid on by employees.
- Responses are interactive and in real-time.
- Details of each interaction are saved in your database for report and audit purposes saving thousands of dollars in overtime and opportunity costs.
- ASF is highly configurable to meet the needs of any scheduling environment.
- Intuitive user interface making usage and adoption easy and fast.
- Leading change management processes for simple adoption in any workplace environment.
- Full security so your data and privacy is safe.
