

Automated Symptom Tracker™

Track your employees and visitors during COVID-19.

The state, provincial, federal and municipal governments of Canada and the United States have set a variety of new mandates and guidelines for employers to follow as a result of the pandemic. Employers have an obligation to keep work environments safe and investigate instances of employees or visitors that have been exposed to COVID-19.

Inefficient Manual Assessments

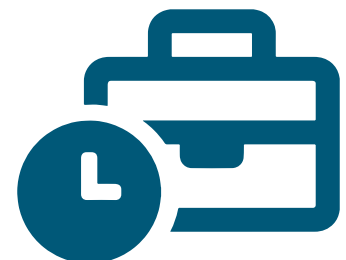

Many businesses and long-term care facilities are currently relying on manual paper-based assessments to track and screen for COVID-19. Paper forms can be easily lost, cumbersome to search through, and ineffective to report on promptly to be effective in contact tracing. These inefficient processes are putting staff and visitors at a higher risk of exposure to the virus. With Vocantas' Automated Symptom Tracker (AST), you can ditch the slow and unreliable paper assessments and reports. AST will allow you to redirect staff resources and funds to other important tasks.

Ditch the unreliable paper COVID-19 assessments

Automate employee and visitor symptom tracking

Eliminate screening inefficiencies and reduce costs

Keep Your Employees and Visitors Safe with AST

AST is an affordable and secure web-based solution that assists organizations with their contact tracing efforts by screening employees and visitors for COVID-19 symptoms. Employees and visitors simply call or text the AST number to answer a series of customizable screening questions before visiting the work environment. When someone reports symptoms or exposure to COVID-19, management receives an automatic alert in real-time. All screening results and reports are available in a user-friendly dashboard located on a secure website with a unique login.

How It Works

1

Employees or visitors call or text a phone number

2

Employees or visitors answer a series of questions

3

Responses are available in real time on a secure webpage with unique login

Your secure Automated Symptom Tracker™ portal can be **set up in one week**. Start protecting your employees and visitors with text and call screening of COVID-19 symptoms and exposure **for just pennies per day!**
