

Perfect water for every
person, every place.

Smart. Connected. Electrified.

SOURCE[™] Hydropanels

Hydropanel creates drinking water from sunlight and air

Self-contained, self-powered

Makes, mineralizes, and delivers water to a tap for any purpose, indoor or out

Completely infrastructure-free, reliable water serving needs from urban to remote locations

How Does SOURCE™ Work?

1

Using solar PV, SOURCE takes in ambient air via fans and adsorbs water vapor from that air onto a hygroscopic material

3

The pure water flows into a 30-liter reservoir where it is mineralized with magnesium and calcium

2

With heat from the sun, SOURCE converts water vapor collected into liquid water, made pure

4

Sensors inside the reservoir monitor and optimize the water to maintain quality

SOURCE™ is Built for Scale

SOURCE[™] Around the Globe

Installed on 6 continents, in 26 countries

SOURCE Value

Quality

Highest water quality, exceeding EPA standards; actively monitored

Resilience & Emergency Preparedness

Produces water onsite despite circumstances; withstands 150mph winds

Technology

Most advanced method to obtain perfected water

Environmental

Renewable, non-extractive, CO² offsetting

Off-Grid, Infrastructure-Free

No reliance on external electricity or water inputs

Diverse Applications of SOURCE™

Hospitality

Schools

Disaster Relief

Child Care

Single Family Homes

Offices

Wildlife

Farms

Government
