

## AMS GASBAG

AMS gasbags are specially designed 2-speed aerosol inflated blast-hole plugs that can be activated and dropped down dry production blast holes for faster decking.

The reliability of all the AMS gasbags are assured using a patented total release actuator making the problems of actuators not latching in hot climates a thing of the past.

The total release actuator comes with 2-speed option, pushing up for slow, and pushing down for fast. Once the total release actuator is activated, the gas impervious multi layered bag inside the robust woven outer sleeve is inflated with non-flammable gas released from the aerosol canister.

The product comes with a break-away tab and uses expansion-retaining wrap keeping the gasbag in tubular form for easy positioning. It is designed using a non-flammable gas with a temperature warning sticker ensuring the safe use of our product in tough mine site environments.

## Advantages

- Saving on explosives
- Stemming enhancement
- Lower vibration and over pressure levels
- Improved fragmentation
- Inflatable design assures perfect seal off
- Fast and easy to install
- 2-speed option
- Temperature warning for added safety
- Enhanced box packaging

Product Code	Blast Hole Size (inches)		Box Qty
	From	To	
<b>AMS105/127</b>	4.13	5	30
<b>AMS150/171</b>	5.5	6.7	30
<b>AMS200/230</b>	7.8	9	25
