### ① About

Entrepreneurship Hub (eHub) is a service provided by your AMS at the University of British Columbia. Our mandate is bringing entrepreneurship education and the entrepreneurial mindset to **all** students. This means creating a *hub* for all the happenings around the entrepreneurship space at UBC and Vancouver at large. We develop in-house programming to supplement the entrepreneurship education offered at the university, and we take a hands on approach to helping students launch their ventures. More information on exactly how we do this can be found at: [www.amsehub.ca](http://www.amsehub.ca)

We launched in January of 2018, and as a relatively new service we want to continue to develop the right away. To make sure we accomplish this, we are searching for a diverse team to share their unique perspectives on the entrepreneurship space while eHub continues to grow. These roles are in no way flushed out perfectly, so the main component of any role is to help define the role and impact the culture here at eHub!

### ② Volunteer Responsibilities

- Time Commitment of 5hr/week minimum
- Dive into all UBC's offering in the entrepreneurship space
- Mapping out what these clubs/services/programs do and understanding their goals and targets
- Creation of a digital display of all offerings, so students can easily navigate through the space
- Help identify ways eHub can better assist the entrepreneurial culture at UBC

### ③ Qualifications

- A student at UBC (any faculty/specialization)
- Ability to analyze qualitative and quantitative data
- Interest demonstrated in entrepreneurship and some awareness of the space
- Excellent oral and written communication skills
- Previous research experience *recommended*
