

SAVERONE™

App Activation and Basic use Android

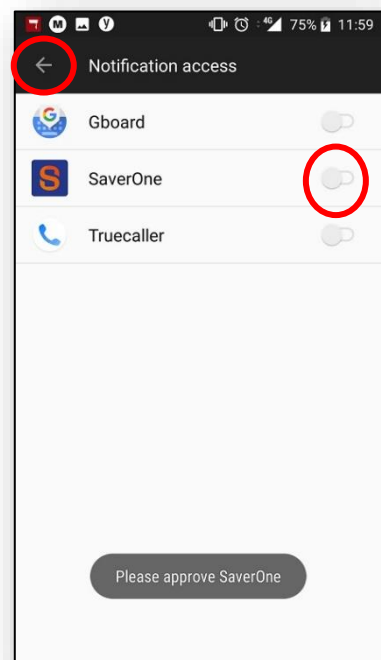

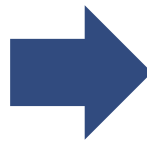

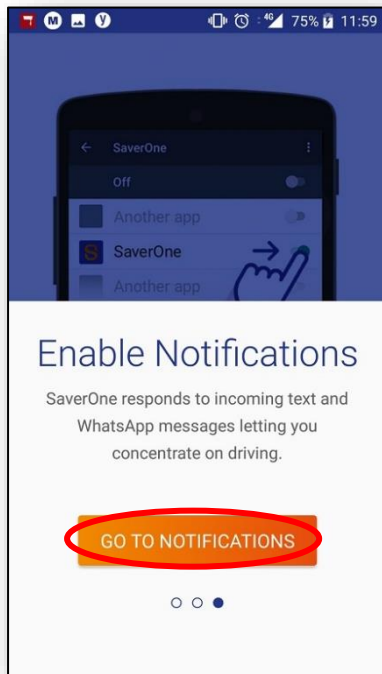

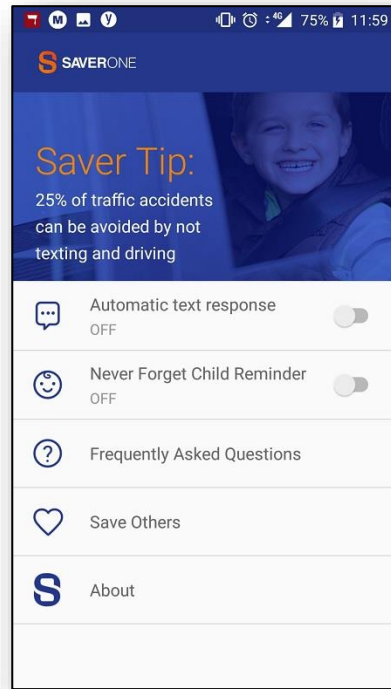

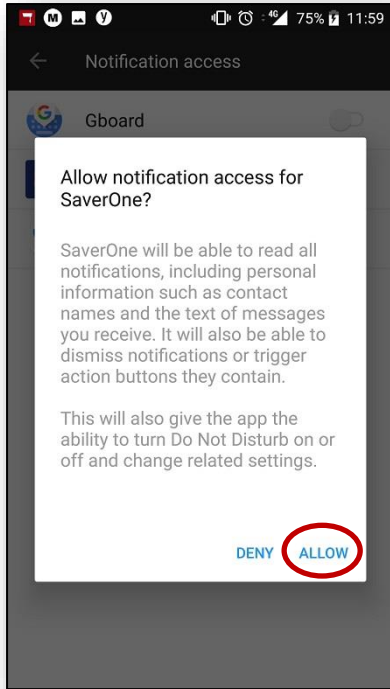

First Installation:

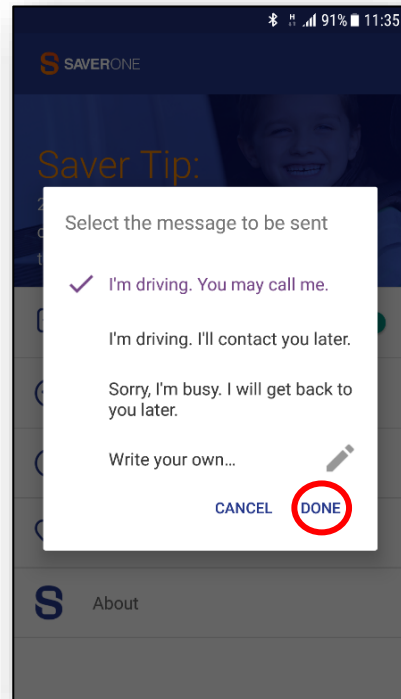

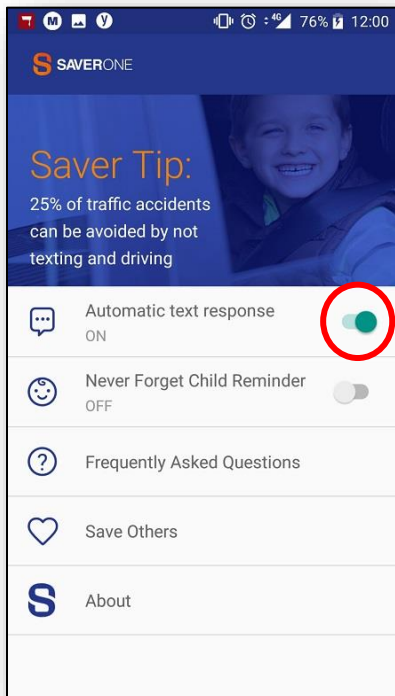

Usage access screen may be different on various Android versions. Search SaverOne on the Usage access menu

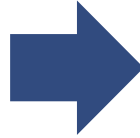

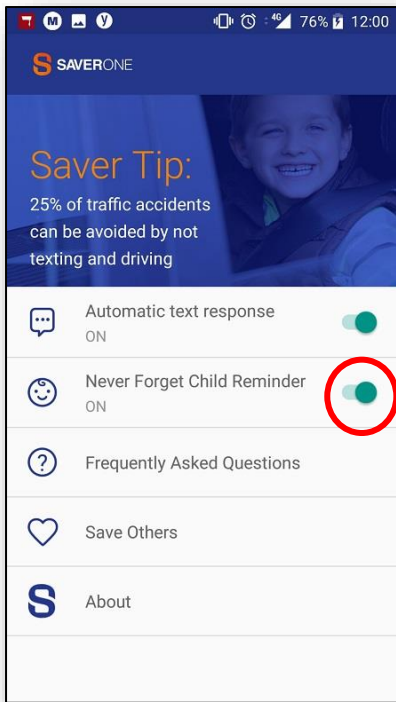

Once the installation is done, the main screen of SaverOne application is seen.

Select required features:

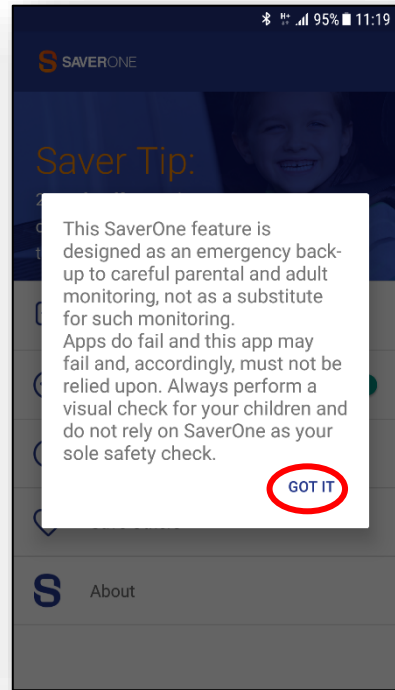

You can change it at any time.

Click to turn on Automatic text response and choose your preferred option.

Turn on/off Never Forget Child Reminder

SaverOne App use:

While your vehicle is in motion, you will be able to use un-distracting apps, such as dialer, navigation and music – as defined by the fleet manager in your organization.

An attempt to use distracting app will be blocked:

Use by other Drivers:

Any driver that will drive a vehicle equipped with SaverOne will have to download and install the application.

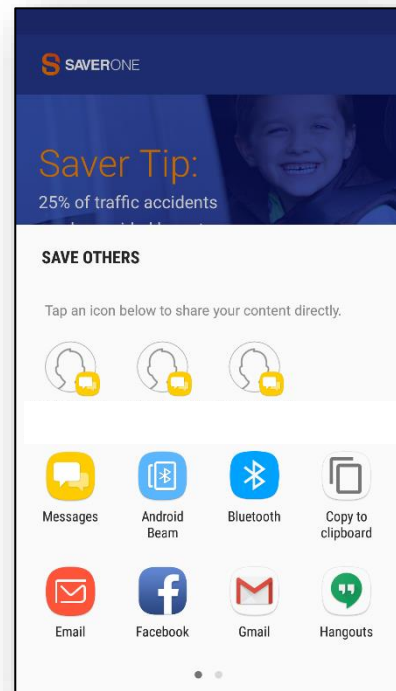

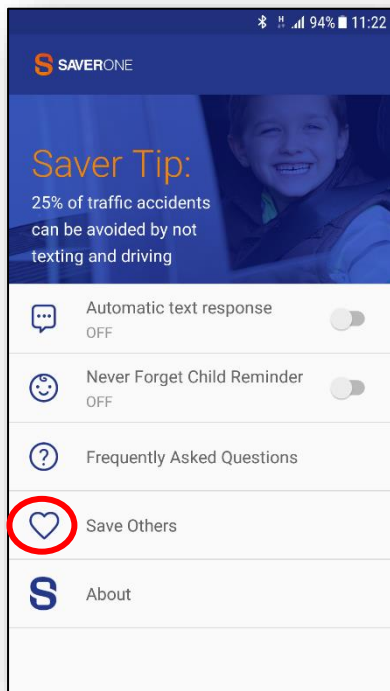

This can be done by:

- Application stores: search for Saverone or use the QR code.

- SaverOne website: www.saver.one/en/support

- Send a link from the SaverOne app:

Press on Save Others and choose application to send an invitation to download SaverOne app.

Have a safe drive!
