

HeatMax™ RF single zone receiver

WHAT IT DOES:

- Suitable for use where thermostatic control is required, but there is no facility to incorporate conventional hard-wiring (especially wet-rooms)
- A quick and easily-fitted solution allowing Continental Underfloor to be added to additional rooms

FEATURES:

- Push-button mode selector
- Manual over-ride
- Cost-effective and reliable

APPLICATION:

- This single channel RF Receiver is for use with the HeatMax™ RF dial, HeatMax™ RF Digital or HeatMax™ RF programmable thermostats, and is linked into the HeatMax™ wiring centre

TECHNICAL INFORMATION:

Power supply	230V AC 50Hz Output Relay 12A 250V AC
Radio frequency	433.92MHz, <10mW
Electrical Protection	IP44
Operating temperature	0°C - 50°C (32°F - 122°F)
Certifications	CE. EN 300220-3 EN 301489
