

HeatMax™ UFH wiring centre

WHAT IT DOES:

- An easy to fit way to achieve individual thermostatic control of Continental Underfloor heating zones
- Allows boiler interlock
- Neat, compact and tidy appearance

FEATURES:

- Wiring centre
- 230 Volt AC
- Allows connection of
 - HeatMax™ Thermostats
 - HeatMax™ zone actuators
 - Boiler
 - Two port zone valves
- Led display
- Also provides volt-free switching
- Modularised, allowing easy, wire-free slide-fitting of additional HeatMax™ extension modules or HeatMax™ NSB timer module

APPLICATION:

- Acts as a wiring centre for a Continental Underfloor system for easy wiring
 - Up to 4 thermostatic zones
 - If used with additional HeatMax™ extension modules, up to 12 thermostatic zones can be controlled
 - A maximum of 4 zone actuators can be controlled via each thermostat zone
- Set-back time control is achieved using the HeatMax™ NSB timer module, with appropriate HeatMax™ night set-back rotary dial or digital thermostat
- LEDs indicate
 - demand for heat on any one thermostatic zone
 - function of the HeatMax™ UFH pump
 - signal to the boiler
