

DIGITAL MESSAGING WITH GLASSLIKE TRANSPARENCY

OUTDOOR VISIBILITY

CUSTOMIZABILITY

ABOUT US

Lumotune makes see-through digital displays with glasslike transparency. The displays can show digital content on windows without obstructing views or daylight. Content on the displays appear like ordinary opaque-white frosting on glass, making it reflective and easy to read in direct sunlight.

EASY INSTALLATION

The mounting frame makes Glass Display easy to install on windows and other surfaces.

CLOUD INFRASTRUCTURE

Glass Displays connect to the internet. A network of displays can be managed remotely.

CONTENT MANAGEMENT SYSTEM

Manage and schedule content through our proprietary web-based software, built specifically for Glass Displays.

Suite 100, 151 Charles St W
Kitchener, ON N2G1H6

Lumotune See-Through Displays

Transparency

Glasslike

Visibility

Vividly visible in direct sunlight

Modular

Any shape, any size

Consumption

Zero watts in static mode

Operating Specifications

Display Type	Transparent & reflective
Connectivity	WiFi or Cellular
Input Voltage	115-240 VAC
Power Consumption	Zero in static mode, 30 W/m ² in active mode
Operating Temperature	-20°C to 70°C
Storage Temperature	-20°C to 70°C
Switching Time	500 ms/line
Viewing Angle	~180°
Clear State Transmittance	83%
Opaque State Transmittance	6%
Switching Cycle	10 ⁷ switches

Panel Specifications

	37" Glass Display	GlassTile	Custom
Size	616mm x 871mm	295mm x 423mm	Modular (unlimited)
Device Weight	10 Kg	1 Kg	
Frame thickness	35.4 mm	9 mm	
Glass Thickness	6.2 mm	2.2 mm	1.1 mm - 6.2 mm
Pixel Pitch	1 mm	1 mm	Custom
Resolution	768 x 512	384 x 256
