| Position | Senior Environmental Professional/Lead | Date | May 31, 2021 |
| Closure Date: | June 11, 2021 | Reports to | Vice President |

Summary of Position

Senior environmental professional, with the ability to support field work and associated reporting in the Grande Prairie area. Execution of some or all scopes of work associated with pre-construction environmental assessments, remediation, and reclamation. This role will include support in selecting and training environmental staff for both field and office and will support the growth and development of services in the area.

Specific Duties

- Be a motivated self-starter.
- Work well alone and be able to collaborate and support others as needed.
- Support both BC and Alberta operations as needed.
- Complete Phase 1 & Phase 2 assessments and/or train others to execute these scopes of work, develop required remedial scopes and ground water monitoring programs and conduct reclamation projects and assessments.
- Complete and/or review technical reports and submission of associated regulator documentation.
- A desire to mentor others and support business development initiatives.
- Identify additional service opportunities based on regulatory changes, client needs, or industry needs.

Required Certifications/Training

- Diploma or bachelor's degree in environmental sciences.
- 5 years of relevant environmental experience.
- Valid safety tickets.
- Professional designation such as P.Ag. RT.Ag, P.Bio, etc.

Subordinate Positions (if applicable)

- Junior field staff when and where applicable.
