

# Invest in some of the most promising startup companies in Skåne and Europe

During Spring 2021, Minc together with Ideon Innovation will set up an investment company for business angels, Fast Track Capital III (FTC3) - the successor to Fast Track Capital II AB, which invested from beginning of 2019 until spring 2021. The state-owned venture capital firm Saminvest matches the allocated private capital up to the same amount.

Fast Track Capital III gives business angels the possibility to spread the risk and become shareholders in a larger number of promising startups with a relatively small capital investment. Investors are encouraged to use the opportunity to make direct follow-on investments in the companies they find interesting.

## Matched follow-on investments

Saminvest offers experienced business angels an opportunity to sign a co-investment agreement with Saminvest, which means that investors' follow-on investment is matched with the same amount of capital, i.e. the investment in the company is doubled. For this, investors receive a carry – a share of Saminvest's profit.

## A strong network of investors

With Fast Track Capital III, both new and experienced business angels are given the opportunity to invest in a number of promising early companies. The investors spread their risk and get to know a number of startup companies that they may follow-on invest in or support in other ways.

For new investors, FTC3 offers a unique opportunity to get started investing in startups and gain access to both a strong deal-flow of promising and quality-assured companies and become part of an ecosystem of startups and investors. Minc and Ideon Innovation work actively to increase the number of female investors and aim for at least 35% of the investors in FTC3 to be women.

ARRANGEMENT	
Number of investors	50-60
Investment tickets	200 000 SEK, 300 000 SEK, 400 000 SEK
