

STACK 'EM UP!

What you'll need

- OddBlocks (single or multiple sets)

How to play**Option 1 (easy)**

- Place the blocks in a central pool.
- Take turns to draw a block from the pool to create your tower. Aim to stack as many blocks as possible without letting the tower topple.
- If the pool is exhausted and there are at least 2 players with towers still standing, the tower using the most blocks wins!

Option 2 (difficult)

- Place the blocks in a central pool.
- Take turns to draw a block from the pool to create your tower. Aim to create the tallest tower without letting the tower topple.
- If the pool is exhausted and there are at least 2 players with towers still standing, the tallest tower wins!

Tips

- Use the unique friction qualities of OddBlocks to creatively stack blocks with difficult shapes!
- Explore shapes and forms: stacking a block in different ways will achieve different heights. Help your child to discover the 3-dimensional relationships in a block.
- Increase the difficulty (and fun!) by selecting blocks for each other!
- Depending on the age of the child, enjoy watching them find delight in toppling the towers! As OddBlocks are lightweight due to the carefully chosen cork material, noise and injury are reduced to a minimum.

As most of the blocks are odd-shaped, this allows for the child to explore and discover the unique forms that are present in a block. The child will understand that stacking a block in various ways will result in various stability and heights, allowing them to have a better sense of spatial awareness. The stacking exercise also helps to refine their motor skills.
