

*we love horses and
the people who love horses*

At Fauna Care we know that the emotional bond with a horse is as strong as with any animal in our lives. Since these amazing and special animals deserve the best health care available we have developed a line of no-touch equine sprays that deliver highly effective skin and wound care products. Fauna Care is made with high concentrations of active ingredients without any irritating preservatives, surfactants, alcohol or fragrances. Great to treat hard to reach areas and the moisture barrier our products create allow your horse to remain active all day while healing occurs. Our products are easy to use, reduce healing time and fight infection.
