

# DEMOLITION WASTE TO INCINERATION

Our Finnish customer needed a reliable system for furnishing its power plant with mixed waste such as plastic, paper, cardboard and wood; and it was accomplished by using PST shaftless conveyors with minimum maintenance requirements.

PST delivered a 115 meter material transport system consisting of 5 conveyors of type V-800 with the longest conveyor being 28 meters.

## THE CASE & OUR SOLUTION

|                           |  |
