

Concept

The Float Hook is informed by the layering of objects in space. A plane hovers off the wall with a machined brass hook superimposed on top, giving the appearance of weightlessness under heavy loads. Available in color-shifting dichroic glass rectangles and classic palettes of circular marble. All single hook orders come in retail-ready gift packaging.

Form & Function

Float is a customizable hanging system with interchangeable backings which easily adapt to different interiors and uses. The hook is attached to the wall with a proprietary system that firmly fastens without any visible screws. Using a larger backplate, Float can grow to accommodate multiple hooks in different formations.

The minimal aesthetic lends a strong, graphic quality to interiors while allowing for custom installations crafted from thoughtfully designed, standardized pieces.

Customization

The size and shape of the hook's backplate can be customized as well as the finish of the metal hook and wall anchor.

Materials

Circle: Red Rosso Levanto or White Statuary Marble
