

# OUR VISION FOR Culture Change Around Abortion

WE ARE WORKING FOR A FUTURE WHERE

1.

Abortion is understood as a basic human right, an essential part of healthcare, and a normal part of life.

2.

Everyone can access safe and affordable abortion regardless of age, class, race, gender identity, ability, geography, immigration status, and insurance status.

3.

Providers and people who have abortions are supported and respected and do not fear or experience judgment, stigma, discrimination, violence, or criminalization.

4.

All people can talk openly about abortion with sensitivity to the complexity and nuances of individual experiences.

5.

Every person is able to make personal decisions about abortion based upon their own beliefs and values.

6.

Media supports the dignity and diversity of individual reproductive decisions and decision-makers. Media truthfully and authentically represents abortion and refrains from sensationalizing the experience.
