

HIVE™
HIGH-DENSITY DEVICE DOCK

HIVE™ stores, secures and charges barcode scanners, body cameras, healthcare scanners, RFID Scanners, two-way radios and most other mobile devices.

HIVE™

High-Density Handheld Charging Cabinet

Make sure your handheld scanners, readers and radios come home after every shift.

SECURITY

Approved user access to radios and scanners; secure devices when not in use.

SPACE OPTIMIZATION

Reduce real estate required for charging scanners and radios.

SAVINGS

Reduce loss, diminishment & damage through proper asset management of devices.

CUSTOMIZATION

Can be customized for most chargeable devices and docking stations as well as available in a variety of colors.

PRODUCTIVITY

Drive efficiency savings with one device location, check in/out, quicker access, charged and ready to use.

SAFETY

Sanitization protocols at the station, cord & cable management, proper chargers for scanners and radios, eliminate waste by having only what you need.
