Full Stack Developer

We’re looking for a **Full Stack Developer** to join our agile team in Porto!

**Who are we?**

![Image of a laptop and clock]

We develop high performance, big data, low latency systems for online marketing. We are an international company with offices in the US, Germany, Denmark, and a development team here in Portugal.

The Porto team is made up of a diverse set of people from multiple tech backgrounds and expertise. If you want to know more, check out weirdmath.com.

**What are we looking for?**

We’re someone that’d **love** to be responsible for:

- Maintaining and developing components of our services (backend and frontend)
- Implementing new features into the UI (from top to bottom)
- Ensuring the consistency of our UI and UX

**It’s awesome if you:**

- Have a strong IT background (Software Engineering or Computer Science)
- Think that these technologies are a breeze:
  - .Net
  - ES6+
  - HTML
  - CSS
  - Git
  - SQL Server
  - UI Frameworks

- Are so comfortable with object-oriented programming that you can do it with your eyes closed
- Enjoy doing UX and solving usability challenges
- Speak and write English easily (but we’re not looking for Shakespeare)
- Have a thirst for knowledge and how things work
- Are a little bit pedantic about clean code

**What we can offer:**

- Great and **flexible** working conditions
- Competitive salary with lots of benefits
- Chance to work on a leading-edge project
- Work right in the center of Porto (close to public transport)
- And all the other usual things – work from home, free snacks, team activities, **beers in the fridge**, and FIFA
