

We're looking for a **QA Analyst** to join our agile team in Porto (remote friendly)!

## Who are we?

We develop high performance, big data, low latency systems for online marketing. We are an international company with offices in the US, Germany, Denmark, and a development team here in Portugal.

The Porto team is made up of a diverse set of people from multiple tech backgrounds and expertise. If you want to know more, check out [weirdmath.com](http://weirdmath.com).

## What are we looking for?

We're looking for someone that'd **love** to be responsible for:

- Verifying and validating new features and functionalities in Semasio's platform
- Creating test suites for new features
- Performing exploratory, functional, black-box, and usability testing for the platform
- Identifying and remedying defects within the production process
- Recommending, implementing, and monitoring a testing flow that ensures quality assurance standards

## It's awesome if you:

- Have at least three years of experience in software quality assurance, auditing, and testing
- Have strong knowledge of software QA methodologies, tools, and processes
- Speak and write English easily (but we're not looking for Shakespeare)
- Have a thirst for knowledge and curiosity about how things work
- Think outside the box and see how small details fit into the bigger picture
- Are ridiculously pedantic and meticulous

## What we can offer:

- Great and **flexible** working conditions
- Competitive salary with lots of benefits
- Chance to work on a leading-edge project
- Work right in the center of Porto (but we're remote friendly)
- And all the other usual things – work from home, free snacks, team activities, **beers in the fridge**, and FIFA
