

Meltemi Total Return Investment Portfolio — MTRIP[®]

Issued by Meltemi Investment Management Limited ('Meltemi')

Overview

Background and description

Stretching back a few decades, major equity markets such as the US and Europe have enjoyed about a 3.5% premium over their risk-free interest rates. Active asset allocation and security selection is likely to generate higher returns. A portfolio simply growing at only 7% per annum will double in value over ten years.

MTRIP is an individually managed discretionary investment portfolio. The portfolio strategy is to make long-only investments in global equities and bonds. To enhance investment returns it may sell ‘covered call options’ and ‘put options’, and also buy/sell up to three months forward foreign exchange contracts of freely tradable currencies, mainly the currencies of OECD countries.

Time Horizon — Years

1 or less	2	3	4	5
-----------	---	---	---	---

Risk

Low	Moderate	Balanced	Higher Risk	High Risk
-----	----------	----------	-------------	-----------

Investment Objectives

Capital Preservation	Income	Growth/Income	Growth	Aggressive Growth
----------------------	--------	---------------	--------	-------------------

Investment objectives

To generate superior absolute returns — typically 3% — 5% above the one-year deposit rate of the reference currency of the portfolio over a business cycle, with less volatility than global equities.

However, there may be extended periods of negative or lower than deposit-rate investment performance. Occasionally the portfolio may even experience a partial loss of the capital and an investor may not get back all of the capital invested.

Structure

The Investment Manager for the MTRIP is Meltemi Investment Management Limited (‘Meltemi’), an FCA registered firm. The principals of the firm have a successful track record spanning over decades of managing funds for wealthy private clients.

We facilitate our clients in opening their accounts at some of the premier international banks; Citibank, HSBC and Bank Julius Baer. The bank will then act as a custodian for the client’s assets. A client will grant power over this account to Meltemi to buy and sell bonds, equities, exchange traded funds (ETFs), foreign exchange, options and any other financial instruments agreed with the client.

The custodian bank will maintain all primary records of investments and will provide trade confirmations, valuations and any other information about the portfolio directly to the client with a copy to Meltemi for it to be able to manage the portfolio. Meltemi will also send a quarterly portfolio review to its clients.

Investment strategy, portfolio construction and risk management

1. Asset allocation

We regularly follow macroeconomic fundamentals and market dynamics of more than 30 countries, sometimes with the help of external economic advisers.

This helps us to determine a framework against which we constantly monitor and readjust country and asset allocation between cash, bonds, equities and currencies.

2. Equities — maximum up to 75%

- > Identify 'growth' companies or companies benefitting from the business cycle and which fit the in-house 'buying growth cheaply' model criteria.
- > Select country and sector ETFs benefitting from cyclical and structural economic growth.
- > Allocate a small portion of the portfolio to contrarian situations whereby a company, a sector or a country has gone through some turmoil but is showing signs of recovery.
- > A maximum of 5% of the portfolio could be invested in a single equity and a maximum of 10% in a single ETF.

3. Bonds

- > Invest part of the portfolio in liquid government and corporate bonds issued in major currencies with five years or less remaining life. Select liquid ETFs of such bonds managed by reputable service providers. Such ETFs, however, may contain bonds with more than five years remaining life.
- > A maximum of 10% of the portfolio could be invested in a single bond or an ETF.
- > Exposure to below investment grade or non-rated bonds and ETFs will be limited to a maximum of 25% of the portfolio value.

4. Currencies

- > Buy/sell up to three months forward foreign exchange contracts of freely tradable currency pairs with the aim of generating capital gains or to enhance the return of the portfolio by going 'long' in a higher-yielding currency and going 'short' in a lower-yielding currency. An example would be the AUD-JPY interest rate difference of 2.50%.
- > The net open nominal value of such contracts may be up to twice the value of the portfolio.
- > All such contracts are liquidated before their maturity.
- > Net non-USD forward foreign exchange (FX) exposure will be up to a maximum of 50% of the portfolio value.
- > All forward FX positions are monitored against a 5% stop-loss.

5. Hedging

Depending on our economic and market views we may partly or fully hedge the non-reference currency exposure of equities and bonds by selling forward FX contracts of the relevant currency by buying 'inverse' ETFs or any other appropriate financial instrument ('the hedge'). The hedge may not exactly match the characteristics of the investment being hedged.

6. Options

We may sell 'covered call options' on equities and earn a premium to enhance the returns on the portfolio. We may also sell 'put options' and earn a premium to enhance the returns or to buy equities at a cheaper level. The total exercisable amount of 'sold' put options will not exceed 100% of the portfolio value. Also the market value of all outstanding short put options will not exceed 10% of the portfolio value. All options will be 'exchange traded' options. All options will be 'exchange traded' options.

Performance and composition

Investment performance % January 2016 to July 2019	2016	2017	2018	YTD 2019	CAGR*	Sharpe Ratio**
USD MTRIP***	11.89	12.22	-13.20	9.08	4.83	0.24
USD One-year deposit rate	1.32	1.68	2.10	2.02	1.84	
Relevant Hedge Fund Indices						
Global Hedge Funds Index	2.50	5.99	-7.00	5.43	1.82	0.00
OMarket Direction Hedge Funds Index****	4.44	4.99	-13.51	4.51	0.97	-0.11

- * Compound annual growth rate
- ** Volatility risk adjusted returns
- *** Weighted average investment performance of portfolios managed as MTRIP.
- **** Most common theme of hedge funds included in this index is to take long and short positions in different stocks simultaneously. Though this approach limits the overall systematic stock market exposure, some exposure typically remains. These funds generally exhibit higher volatilities and higher correlations to standard directional benchmarks of equity, bond market and hedge fund industry. (Source: HFRX)

Important information

Past performance is not a guide to future results, real results may vary. The value of investments and the income from them can go down as well up. The portfolio may hold investments that are not guaranteed or insured by anyone and are subject to investment risk. An investor may not get back the full amount originally invested.

Exchange rate changes may cause the value of an overseas investment to rise or fall against the reference currency.

Investors should be aware that investment in derivatives e.g. forward foreign exchange contracts and options involves an above average degree of risk due to the geared nature of these instruments.

Composition

Forward foreign exchange

Notes

The portfolio composition in September 2019 is representative and not a recommendation. It reflects our current preferred sectors and countries and will change over time as economic cycles and structural changes progress, and is subject to change without prior notice.

Income and dividends from ETFs and shares listed in the US are subject to 30% withholding tax by the United States government.

Asset Prices in a Business Cycle

Key portfolio details

Investment manager	Meltemi Investment Management Limited, a company registered in the United Kingdom authorised and regulated by the Financial Conduct Authority (FCA).
Minimum investment	USD 3,000,000.
Reference currency	USD or Euro.

Custody, administration and brokerage	Charged directly by the custodian bank according to their fee schedule. (Meltemi may be able to negotiate favourable terms for its clients.)

We have a unique investment team and investment ethos. Three senior members of the investment team have known each other for over 25 years and have worked together in senior investment management positions in some of the top international financial institutions. They are highly respected in their individual areas of expertise: global asset allocation, currencies management, equities, bonds and options.

A small team enables us to react to changing markets quickly, meaningfully and efficiently, and also to construct tailor-made individual portfolios according to client needs.

The principals of Meltemi invest a substantial part of their financial net worth according to the investment philosophy and strategy described in this document.

FIKRET ONDER

Born in Turkey, Fikret Onder studied Economics at the University of Bonn (Germany), where he worked as an assistant professor for two years after his graduation. His finance career started at Merrill Lynch AG, Düsseldorf in 1981. He became Head of Institutional Equity Sales at Sal. Oppenheim Jr. & Cie, Cologne where he worked from 1985 to 1992 before joining Citibank Private Bank, London as Lead Portfolio Manager for Global Equity portfolios. In 1995 he joined UBS Private Banking, London as a senior portfolio manager. In 1998 he moved to Julius Baer & Co., London where his responsibilities were extended to cover marketing activities as well as asset management.

In July 2000 he was appointed Executive Vice President and Head of Private Banking of AKBank in Istanbul, starting this business unit from scratch. By the time he left in July 2011, assets under management had reached USD 13.5 billion. AKBank Private Banking was awarded the 'Best Private Bank in Turkey' prize in four out of the six last years under his management by *Euromoney* magazine.

Fikret joined Meltemi in September 2011 as a principal and portfolio strategist.

CEM BALCISOY

Cem Balcisoy has over 15 years' experience of advising and dealing with ultra-high net worth individuals based in Europe and Turkey. After achieving an undergraduate degree in Electronic Engineering from Nottingham University in 2000, he started his finance career at American Express Bank in London as an account officer handling risk assessment of financial assets and then advising on investment products to meet customer needs and requirements.

In 2004 he was awarded an MBA in Finance from Nottingham Business School (part of Nottingham University). He joined National Bank of Dubai in London (now known as Emirates NBD) to help establish a Turkey Marketing Desk mainly to provide investment-related services to ultra-high net worth individuals. This was followed by move to Barclays Bank in London in 2008 where he was part of the international private banking team mainly concentrating on Turkish clients for investment banking services, real estate consultancy and portfolio management.

Cem joined Meltemi in September 2011 as a portfolio manager.

Advisors

SIKANDER H. KHAN

Sikander H. Khan has 40 years of investment management experience. Prior to forming Meltemi he was the Chief Investment Officer of Standard Chartered Grindlays Private Bank, where he managed a team of investment professionals globally, providing discretionary and advisory investment expertise to the high net worth clients of the Bank.

He joined Citibank in 1986 and by the end of 1998 he was Senior Investment Manager and Head of Investments at Citibank Private Banking Group in London. Sikander was also the lead manager of the Luxembourg-registered CitiLandmark Managed Currency Fund. In 1997 and 1998 the Fund was awarded first place in the Standard & Poor's Micropal Offshore Territories Money Market International (Managed Currency) Sector.

He is a qualified Wealth Manager in the UK, is a Senior Chartered Accountant qualified with the Institute of Chartered Accountants in England and Wales, and a graduate with a Bachelor's degree in Economics and English Literature.
