

## Net Neutrality Policy

Mojo Broadband believes in an open Internet. Our policy is as follows:

- All Internet traffic is treated equally for all content providers.
- We only throttle traffic based on subscriber's service speed, not by any content criteria.
- We use CoS and QoS to prioritize real-time traffic (voice and video) equally for all traffic.
- We do not use DPI (Deep Packet Inspection) for any purpose.
- We reserve the right to engage in reasonable network management practices to protect the network and enforce the Acceptable Use Policy.
