

Bed Bug & Dust Mite Killer Contact Spray

Proof® Bed Bug & Dust Mite Killer is a contact spray that reaches where others will not. Proof® will get into cracks, crevices, corners, as well as other places bed bugs hide.

Our product is also effective against dust mites. For ongoing control, simply apply the product every two weeks, along with a regular cleaning regimen, to help alleviate allergy symptoms and control dust mites.

How It Works

Proof® does not kill using conventional neurotoxins found in many competitor products. Instead, it uses neem as the active ingredient to kill bed bugs through suffocation. This is a less toxic and more effective method.

Precautions

Read the bottle label for full instructions and precautionary notes. If in doubt, seek help expert help.

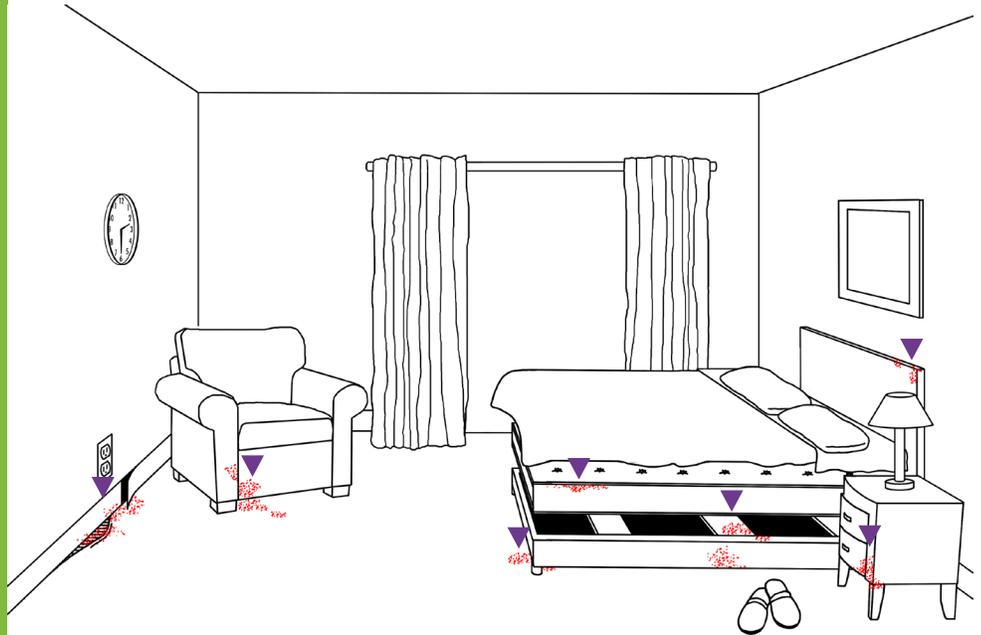

Make small inconspicuous spot treatments to test all surfaces and fabrics for color fastness, discoloration or damage before use.

Do not apply direct to electrical outlets or to other potential electrocution hazards.

Do not spray to the point of excessive dripping or run off to avoid potential material damage.

Quick Start Guide

Read bottle label instructions for full details

- ▶ Use this to help you find and kill where bed bugs hide.

Use Proof® in Four Easy Steps:

1

Shake the bottle thoroughly.

2

Evenly spray on all surfaces in the affected room, including carpet, furniture, bedding, and upholstery.

- ▶ Heavily carpeted or cluttered areas will need more attention.
- ▶ A strong smell is normal and completely safe.
- ▶ A 16oz bottle should be enough for a 100 sqft. room.

3

Leave for four hours, closing all doors, windows, and vents to let the product work.

4

Air out the room.

- ▶ Heat treat your bedding on high heat, then wash.
- ▶ Vacuum the room to clean up dead bed bugs and eggs. Do not vacuum live bed bugs, as this can cause the infestation to spread.
- ▶ The smell may last up to two weeks, depending on application.
