

## Bed Bug & Dust Mite Killer Spray

Proof® Bed Bug & Dust Mite Killer is 100% effective against bed bugs and their eggs. Proof® will kill on contact, then evaporate to penetrate hard-to-reach areas where bed bugs hide.

Proof® is also effective against dust mites and their eggs. For ongoing control, simply apply the product every two weeks, along with a regular cleaning regimen, to help manage dust mite infestations.

### How It Works

Proof® does not kill using harmful neurotoxins found in many competitor products. Instead, it uses patented technology that enables it to evaporate and reach areas that other sprays will not. This means a better, more effective treatment.

### Precautions

Read the bottle label for full instructions and precautionary notes. If in doubt, seek expert help.

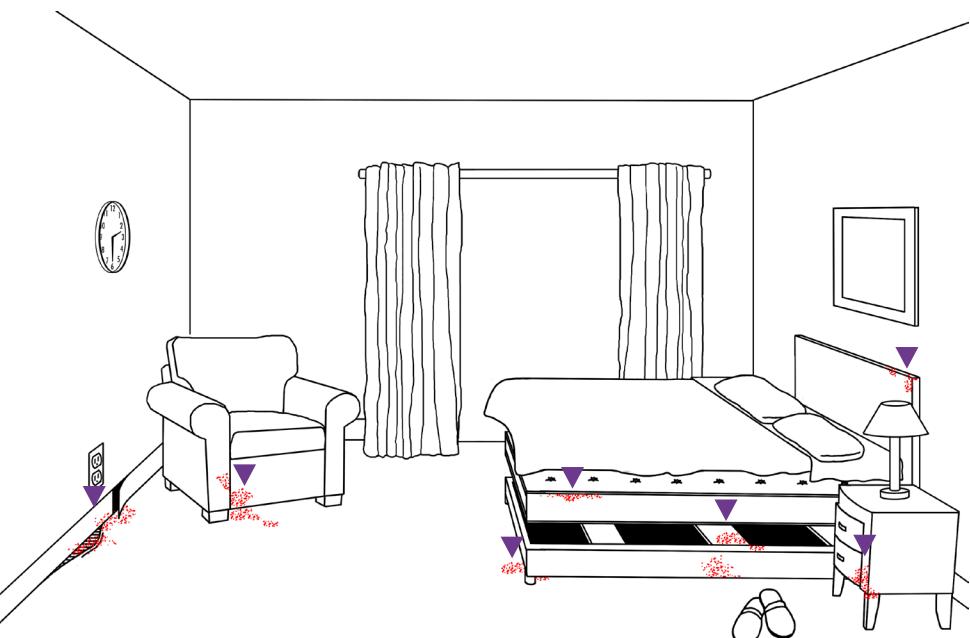

Make small inconspicuous spot treatments to test all surfaces and fabrics for colorfastness, discoloration or damage before use.

Do not apply directly to electrical outlets or to other potential electrocution hazards.

Do not spray to the point of excessive dripping or run off to avoid potential material damage.

# Quick Start Guide

Always read the bottle label for product directions and precautionary notes.

- ▶ Use this to help you find and kill where bed bugs hide.

## Use Proof® in 4 Easy Steps:

1

Shake the bottle thoroughly.

2

Spray evenly on all surfaces in the affected room, including carpet, furniture, bedding, and upholstery.

- ▶ Heavily carpeted or cluttered areas will need more attention.
- ▶ A strong smell is normal and not hazardous.
- ▶ A 16 fl. oz. bottle should be enough for 96 sq. ft.
- ▶ Heat treat fabrics in the dryer on high heat, then wash.

3

Leave for 4 hours and close all doors, windows, and vents to let the product work.

4

Air out the room.

- ▶ Vacuum the room to clean up dead bed bugs and eggs. Do not vacuum live bed bugs, as this can cause the infestation to spread. Dispose the vacuum bag after.
- ▶ The smell may last for up to two weeks, depending on the amount applied and surfaces sprayed.
