

Calmark Sweden – Laboratory assistant position

Calmark Sweden AB

Calmark Sweden is a medtech company developing a point-of-care-instrument for tests of babies during their newborn period. The instrument consists of a reader and consumables, and is based on a colorimetric method. At the moment, we are developing tests for bilirubin, glucose and LDH. The project will soon enter the validation and verification phase. Launch of the instrument is planned for 2020. Calmark is based at Greenhouse Labs at KTH, Stockholm and at Karlstad Innovation Park.
