Pisa II® is one of the most versatile and widely accepted retaining walls on the market. It's perfect for all applications, including walls, planters and step construction. Pisa II's modular units interlock with a built-in setback that automatically forms the correct slope, ensuring a stable wall. When installed appropriately, special wedge shaped units help form curved walls and steps.

The split-face appearance of Pisa II® has a natural, quarried look that blends harmoniously with foliage and plantings.
