CrisisGo Achieves AWS Education Competency Status;
Builds on Strategic Relationship with Amazon Web Services

St. Louis, Missouri: CrisisGo, Inc., the leader in digital emergency communications and safety management, announced today that it has achieved Amazon Web Services (AWS) Education Competency status. This designation recognizes that CrisisGo has demonstrated technical proficiency and demonstrated success building solutions that support mission-critical workloads of K-12 Primary/Secondary customers.

Achieving the AWS Education Competency differentiates CrisisGo as an AWS Partner Network (APN) member that has delivered proven customer success providing specialized solutions aligning with AWS architectural best practices to support the academic experience of teachers and learners and/or improve the operational needs of administrators. To receive the designation, APN Partners must possess deep AWS expertise and undergo an assessment of the security, performance, and reliability of their solutions.

"CrisisGo is proud to be one of the first APN partners to achieve AWS Education Competency status," said Chris Vuillaume, General Manager for CrisisGo. "Our team is dedicated to helping educational institutions achieve their goals of providing safe learning environments by leveraging the agility of AWS."

AWS is enabling scalable, flexible, and cost-effective solutions from startups to global enterprises. To support the seamless integration and deployment of these solutions, AWS established the AWS Competency Program to help customers identify Consulting and Technology APN Partners with deep industry experience and expertise.

CrisisGo is a premier safety and incident management platform that aligns communication across and within multiple agencies. First responders, safety and security teams, district and school staff, students and community trust this reliable platform to rapidly respond to incidents, notify people based on response protocol-defined roles in real time and facilitate recovery faster. CrisisGo helps prevent and prepare for critical situations that can impact anyone, anywhere.

"This designation continues to build on our strategic relationship with AWS," said Vuillaume. "We are an APN Advanced Technology Partner, which means the CrisisGo platform runs on AWS to ensure some of the most reliable, secure, and redundant connections for our clients. Today we are piloting clients with IoT devices, testing Amazon Alexa skills with our platform and more. We believe a strategic relationship with AWS allows us to provide enhanced safety and security for our clients."

About CrisisGo

CrisisGo saves lives by providing a comprehensive safety platform that allows schools and organizations to stay connected and utilize critical safety resources to navigate any situation from the start of an emergency to its resolution. Safety is a shared responsibility, and our platform allows everyone to play their role in safety. CrisisGo's digital safety tools have been chosen by over 14,000 schools and organizations.
