

Application

- 

1 Use the microfiber dust cloth to take away any particles/ smudges from your mobile.
- 

2 Do as the Karate kid does, Wipe on, wipe off. Wipe your mobile screen with the alcohol prep pad. Wipe down screen again with microfiber dust cloth. Make sure no dust particles/ smudges are visible on your mobile screen.
- 

3 Remove the Peek Screen tab and line up the Peek Screen cut outs perfectly to your mobile screen cut outs.
- 

4 Press the Peek Screen at its center and let our gravity adhesive do its job. Press out any air bubbles.
- 5 Enjoy. You now have a screen that holds a lot of power.
