

# ULTIMATUM #1 TO WORLD LEADERS

Dear Leaders,

We the People of this dying planet have had it with you.

You have colossally mishandled the climate crisis. You are guilty of gross negligence. You are leading us toward extinction.

We can no longer trust you to create a liveable future for humanity. And so, we are taking matters into our own hands.

In the coming weeks, we will be sending you a series of simple, step-by-step demands laying out what needs to happen *right now* to avoid the worst.

**THE THIRD FORCE**

Our first demand:

**Immediately call an extraordinary leaders' summit of the G20 to declare a Global Climate Emergency**

If you haven't moved on this by the end of the year, we will occupy your offices, your cities, your yachts, your driveways. We will throw pies in your faces (your "just desserts"). We will do our best to make sure you never again threaten humankind's well-being by holding any kind of public office.

And come May 1st of next year, if you still haven't declared a Global Climate Emergency, we will ramp up the intensity of our civil disobedience and bring this doomsday machine of yours to a sudden, shuddering halt.
