

iOS Developer (m/f)

As of now we are looking for a highly motivated iOS Software Engineer to boost TeleClinic. Our goal is simple: Revolutionize the way people experience healthcare!

BACKGROUND

Healthcare is expensive, time consuming and inflexible. Let's change that! We took the responsibility to create a platform that connects all of the parties involved, bringing together patients, doctors and insurers. We went one step further by trying to provide patients both reactive and proactive ways to keep healthy. For this, we are looking for a talented iOS developer who wants to boost TeleClinic.

YOUR CHALLENGES

You want to bring the doctor to the patients' home? As iOS Software Engineer you will improve our iOS Apps for iPhone and iPad.

More in detail your tasks will be:

- Create new features using the latest iOS APIs and SDKs and develop them constantly based on users' feedback
- Work closely together with our designers and developers to create the best possible User Experience
- Exciting tasks such as the integration of Smart Sensors to monitor body data, e.g. blood sugar in our apps

WHY JOIN TELECLINIC?

- Be part of a cross-functional and highly motivated team
- Continuous learning and consultation from experienced developers
- Possibility to travel and join tech conferences
- Agile working style
- Competitive salaries
- High responsibility right from the start
- Free snacks and coffee

YOUR PROFILE

- Bachelor's or Master's degree in Computer Science or equivalent
- Profound knowledge and experience regarding iOS-Applications with Swift
- You are familiar with common frameworks in the iOS ecosystem like CocoaTouch, Alamofire, RxSwift and are interested in dealing with WebSocket and WebRTC
- You know how to write object-oriented and testable code and have a good sense for design patterns
- Accurate way of working (clean code, documentation, structure)

YOU ARE THE PERFECT MATCH FOR THIS POSITION?

Please send your CV or GitHub profile to jobs@teleclinic.com
